

# Quick Reference

## Setup (pg. 82)

1. Pick a Scenario.
2. Set up the board.
3. Determine Weather & Conditions.
4. Determine Initiative.
5. Deploy as per Scenario.

## Tests (pg. 35)

**ALL tests are DR12, unless specified.**

You roll a D20, add and subtract relevant modifiers, and check the result. If you reach at least 12 you succeed.

Rolls of 20 on the die are Criticals.  
Rolls of 1 on the die are Fumbles.

## Each Game Round

1. Determine Initiative. (pg. 34)
2. Players alternate activating a single model. (pg. 36)
3. Activate Monsters (pg. 46).
4. End game round.

## Activating (pg. 36)

Pick a model.

It can move and perform an action.  
Performing an action ends the model's activation.

## Actions (pg. 36)

- make a **melee attack**
- make a **ranged attack**
- use **Equipment** or **Feats**
- use a **Scroll** to cast a spell
- pick up and/or drop any number of Items off the ground or Dead/Downed models within 1 inch
- **Interact with Treasure** or **Scenario Items** within 1 inch.
- make a second **move**

## Combat (pg. 38)

Models within 1 inch of each other are **in combat**. Ranged

attacks have a max range of 12 inches.

1. Check range.
2. Check if cover is applied.
3. Check which Stat the Weapon uses and add the relevant modifier to the roll.
4. Roll attacks (models in melee roll at the same time
5. ~~and apply the results).~~ **and apply the results).** damage.
6. Mark off any Ammo used.
7. If models are at 0HP they are **Downed**, place them face up on the board.  
Monsters at 0hp are Dead, place them face down.

## **Movement** (pg. 35)

Models move 5+ Agility inches.

Climbing halves your speed.

Models can jump gaps 3 inches or less by passing an Agility test.

Failing causes Injury.

## **Leaving Combat**

1. The opponent rolls a DR12 Agility test.
2. On success your model does not move.
3. On failure your model moves.
4. If the opponent Fumbles you can move and take an action.
5. If the opponent Criticals they make an attack against you.

## **Morale** (pg. 41)

When a model checks Morale they make a Presence test.

On failure they flee the fight.

On success they act as normal.

*Models must make check Morale when they:*

- are Critically hit.
- strike a Downed enemy.

## **Spellcasting/Scrolls** (pg. 24)

Maximum range is 12 inches.

Make a Presence test.

On failure mark a Tragedy. On Fumble roll on the Calamity Table, adding current Tragedies.

## **Omens** (pg. 42)

Can be used at any time.

Each can only be used once per Scenario.

**Devastation:** Deal maximum damage with an attack.

**Fate:** Reroll any dice, yours or

someone else's.

**Grace:** Remove a Downed model from play. It auto-passes its Death Save.

**Banality:** Cancel one Critical or Fumble.

**Greed:** Reroll on the Treasure Table.

**Confidence:** Automatically pass one test e.g., jumping, Morale, or combat.

## **Monsters** (pg. 46)

1. Check special rules.
2. Check if it can see other models.
3. Move it 2D6 inches towards the nearest visible model.
4. Check range.
5. Roll attacks.

Remember: all Monsters roll all tests against DR12.

## **Post**

### **Scenario** (pg. 86)

1. Receive 10 Gold.
2. Roll **Death** Saves (pg. 86).
3. Roll for Injuries (pg. 88).
4. Sell and buy Items (pg. 18).
5. Gain and spend XP. (pg. 86).
6. Hire new members.
7. Purchase Hogs Head Inn upgrades (pg. 131).
8. Reallocate Equipment.

# VRIPRIX THE MAD WIZARD

He seeks the desperate, in the  
ruins of Kergüs.

He seeks the forbidden psalm,  
a nameless scripture he  
claims can stop the

DARKNESS.

Whether there is truth to  
the Mad Wizard's ramblings  
or not, his coffers run deep:  
promised riches await  
those strong, quick, or  
cowardly enough to survive

Healing back treasures

And in these bleak times,  
good coin is hard to  
come by.

## FORBIDDEN PSALM

is a 28mm miniatures agnostic game. Use any miniatures you already own, or build custom minis and terrain.

Grab some dice, some miniatures, a tape measure, and a **2 foot by 2 foot** board, and you are ready to play.

## MEASURING

Measurements are in inches and you can pre-measure.

## DICE ROLLS

Dice Rolls (DR) are used to determine the outcome of actions taken. Players must roll at least the number after DR to succeed. Tests in Forbidden

Psalm are generally DR 12 on a D20, meaning you must roll at least 12 to succeed, with all modifiers taken into account.

## MODIFIERS

Stats, Feats, Flaws, and Weapons add modifiers to the result of the die roll.

Modifiers stack.

FORBIDDEN PSALM IS INSPIRED BY FOLKLORE AND FICTION, SOME REAL, SOME MADE UP. IT IS SET IN A WORLD THAT DOES NOT EXIST AND NEVER DID. IT DRAWS ON HISTORY AND FICTION FOR INSPIRATION AND THEME, AND CONTAINS SOME GRAPHIC VIOLENCE AND DRUG USE.

THIS IS A GAME OF MADE UP THINGS SET IN AN APOCALYPTIC WORLD. AS SUCH, PLAY WITH WHATEVER MINIATURES YOU HAVE, PAINT THEM HOWEVER YOU WANT, AND CALL THEM WHATEVER YOU WISH.

FORBIDDEN PSALM IS A GAME FOR EVERYONE. ANYONE WHO IS PREJUDICED, BIGOTED, OR WHO THINKS THAT ABUSE OR HATRED OF OTHERS BASED ON SEX, GENDER, ETHNICITY, OR ANY OTHER CHARACTERISTIC ARE ACCEPTABLE SHOULD FIND A DIFFERENT GAME TO PLAY.

THIS MESSAGE SHOULD ONLY OFFEND SOMEONE WITH THOSE VIEWS, SO IF YOU ARE OFFENDED BY THIS MESSAGE, THIS GAME IS NOT FOR YOU.

Warband members: digital kitbashing and resculpts using models and bits from Artisan Guild, Vae Victis, Gutsy, Bugman\_140, Dog\_Einstein, along with some original sculpts.

Afanc; original sculpt by Adje.

Sneaky skeletons in the background: Printed Encounter.

Afanc Pool: modified Printable Scenery model with bits from Chernish.

Other terrain: Printable Scenery and Terrainify put together by Adje.

# Creating a Warband

To explore the ruins of Kergüs you need a warband of desperate souls consisting of 5 miniatures.

Select 5 models to use.

1. Assign each model a name.
2. Assign the warband a name.
3. Allocate Stats (pg. 12).
4. Roll a Flaw for each model (pg. 14).
5. Roll a Flaw for each model (pg. 16). Roll on Equipment and Weapons (pg. 18).

# STATS

For each model in a crew, take one of the following lines

+3, +1, 0, -3  
or

+2, +2, -1, -2

and assign it to their Stats as you see fit.

## AGILITY

Used for Agility based attacks and movement (pg. 35).  
A model's movement is 5+ Agility inches.

## PRESENCE

Used for spellcasting (pg. 24), ranged attacks (pg. 39), and  
Morale (pg. 41).

## STRENGTH

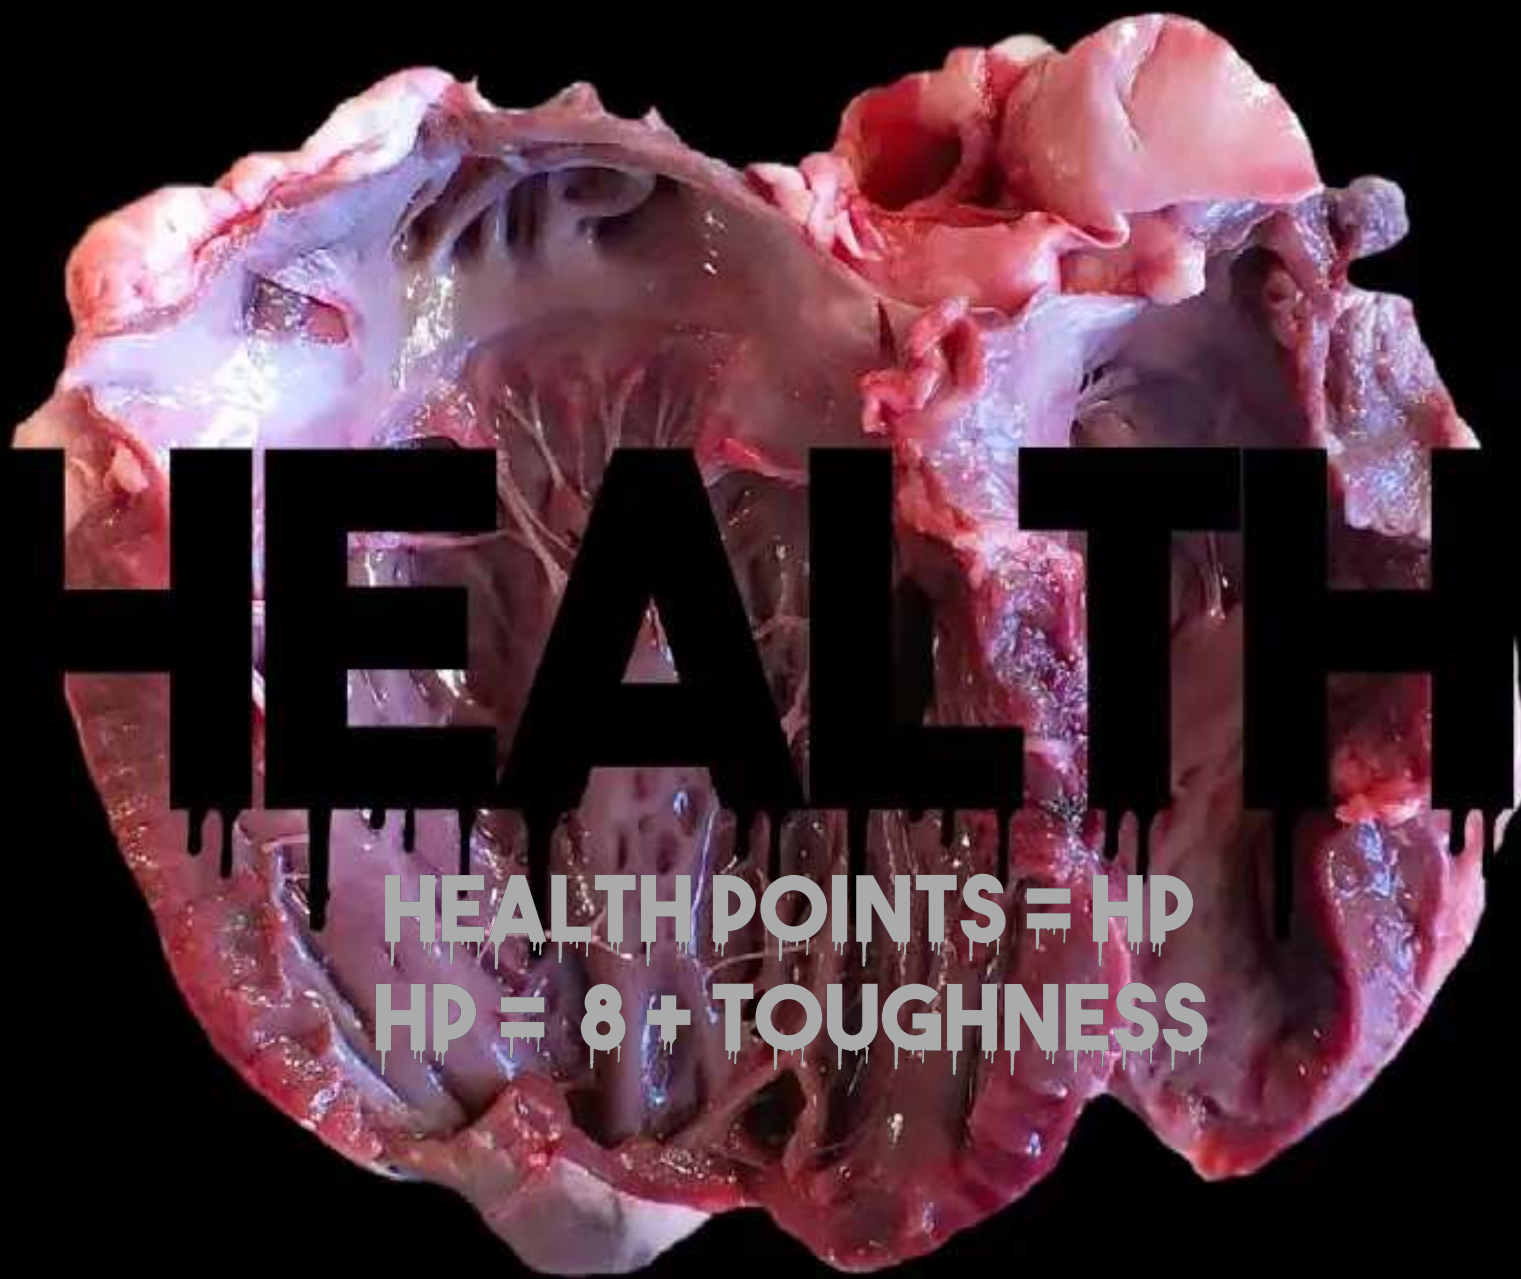

Used for Strength-based attacks and Equipment slots.  
A model has 5+ Strength slots for Equipment (pg. 19).

## TOUGHNESS

Used for Health and tests against Diseased (pg. 22), Infections,  
and Poisoned (pg. 23).

When warband members reach **0 HP** they are **Downed**. If they take any more damage after being Downed they are **Dead**.

All lost **Health** is regained between Scenarios for surviving warband members.

**Downed** models must pass **Death Saves** after each Scenario (pg. 86).

EXAMPLE: NIFEHL THE HERMIT IS ASSIGNED AN AGILITY OF +3, PRESENCE OF 0, STRENGTH OF -3 AND TOUGHNESS OF +1, GIVING HIM HP OF 9.

# FLAWS D100

**1-4. CURSED** roll two

more times and apply all results.

**5 - 8 . Gummy Foot**

suffers -1 to movement.

**9 - 12 . Brittle Bones**

+1 to damage when hit.

**13-16. Putrid Smell**

all other models within 3 inches

suffer -1 to Presence tests.

**17-20. Weak Hands** can only

wield One-Handed Weapons. Cannot use Shield or Torch and hold a Weapon!

**21-24. Greasy Hands** suffers -1 to all Agility tests.

**25-28. ONE EYED** suffers -1 on all ranged attacks and all spells.

**29-32. Malnutrition** suffers -1 to all Strength tests.

**33 - 36 . Scared of Heights** cannot climb or jump.

**37-40. Angry** if a non-friendly model is within line of sight this model must move towards them and make an attack if possible. This uses the model's action and movement.

**41 - 44 . Weak Bodied -1HP.**

**45-48. Vacant Mind** uncaring of the real world, they never collect

Treasure or Items from the battlefield.

**49-52. ALLERGIC TO METAL** cannot wear metal Armor.

**53-56. Squeamish** -1 damage dealt to others.

**57-60. SLOW LEARNER** +1 XP required to level up.

**61-64. Scared of Monsters** -1 to attack Monsters and beasts.

**65-68. Loner** -1 on all tests when within 2 inches of a friendly model.

**69-72. Realist** cannot use Omens.

**73-76. POOR MORALE** must make a Morale test whenever they take damage.

**77-80. NEWBIE** gain no Flaw and no Feat.

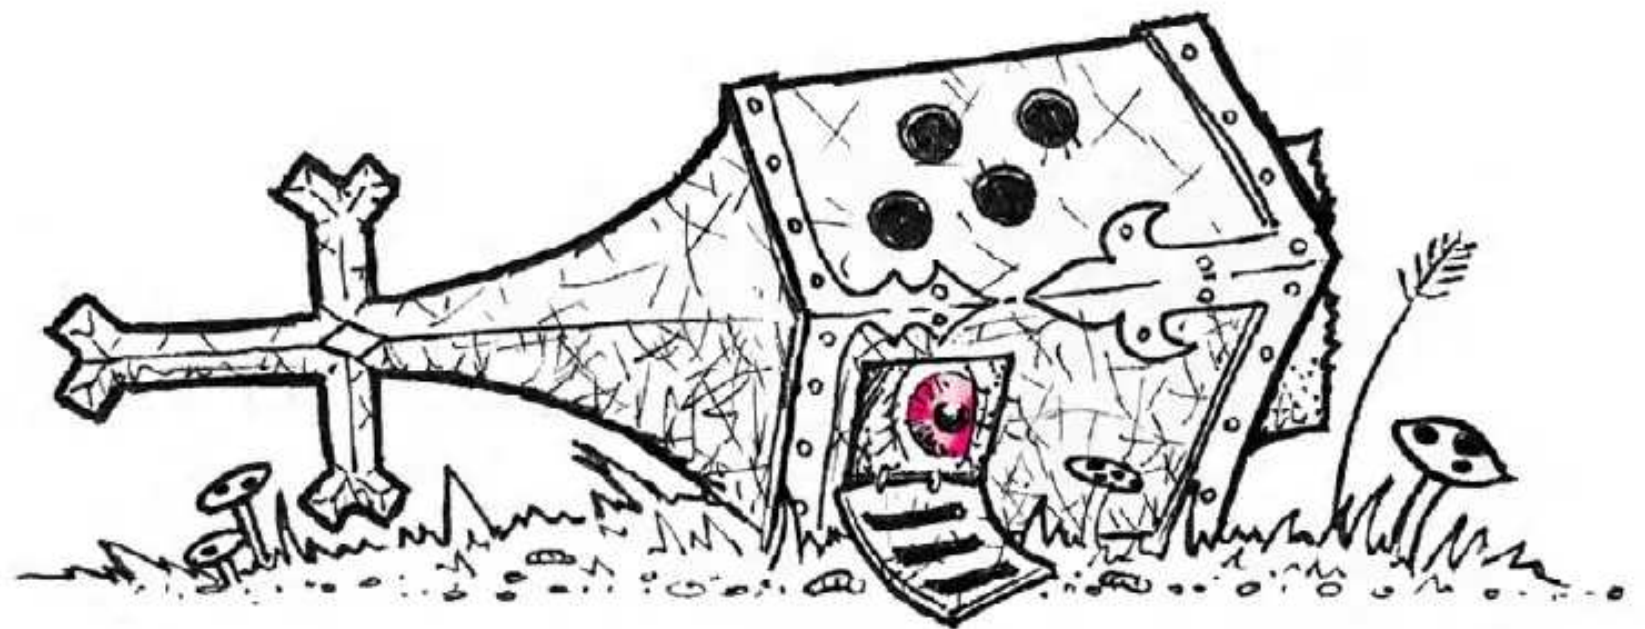

**81-84. Luddite** can't use Weapons that Explode.

**85-88. Scared of Dying** when any warband member dies, this model auto-fails a Morale test.

**89-92. STEADY ON** can only move once per activation.

**93-96. One foot in the Grave** if Downed, this model auto-fails their Death Saves (pg. 86).

**97-100. Dutch Courage** must have Whisky equipped in order to participate in a Scenario.

# Feats

## 1-4. Intimidating Presence

as an action, this model can force an enemy model to make a Presence test. If it fails, you can

make a full move with that model as if it were yours, or make it drop a weapon.

## 5-8. Slippery When Wet

model auto-leaves combat.

## 9-12. Cowardly

model suffers -1 on all Morale tests but gains +1 Agility.

## 13-16. Meathead

+2 Strength and -1 Presence.

## 17-20. Mind over Matter

model can make a Presence test to ignore D4 damage each time they are hit.

## 21-24. Through Gritted

**Teeth** model can make a Presence test to avoid being Downed **once** per Scenario. They remain standing with 1 HP.

## 25-28. Revolting

**Appearance** enemies suffer -1 to hit this model.

## 29-32. What we do in the

**Shadows** model can heal by drinking the blood of others. Make a melee attack and heal damage dealt. **Gain Teeth[D4][Agility][Cruel]**. Model cannot be healed by any other means.

## 33-36. Hard to See

model cannot be targeted by enemy ranged attacks, and cannot make ranged attacks itself. Spells work as normal.

## 37-40. Tough as Nails

+2 HP and -1 Agility.

## 41-44. Marksman

increase this model's range by 3 inches when using Ranged Weapons.

## 45-48. Vaccinated

model is immune to Diseased (pg. 22).

## 49-52. Rat Catcher

model gains a free Bag o' Rats (pg. 19).

## 53-56. Alchemist

model starts each Scenario with a Potion (pg. 18).

## 57-60. Animal Lover

warband pays half cost to recruit Pets (pg. 30).

**61-64. Scavenger** makes two Treasure Rolls (pg. 41) when searching and takes both results if they have sufficient Equipment slots free. Excess Items are placed on the ground.

**65-68. Barkskin** +1 Armor from tough skin, but -1 Agility.

**69-72. Clawed Nails** replace Fists with Claws.  
**Claws:** [D6][Agility]

**73-76. Swindler** at the end of a Scenario, if they survive Death Saves (pg. 86) they get one free roll Treasure Roll (pg. 41).

**77-80. Medic** as an action can make a Presence test to heal one Downed model in line of sight. That model is restored to 1 HP and returns to the fight.

**81-84. Improvised Fighter** as an action model can make a One-Handed Makeshift Weapon mid-Scenario.

**85-88. Shield Bash** deals an additional 2 damage in melee combat when equipped with a Shield.

**89-92. Lucky Goblin Foot** model can reroll any one die roll per Scenario but has

-1 Equipment slot.

**93-96. Charge** model can move 2x its movement value but must end within an inch of an enemy.

If it cannot it moves as normal.

**97-100. Feint/Disarm** when attacked in melee this model can make an Agility test to Feint instead of attacking back. If successful, this model avoids damage. If the attacker also fails to hit, they are disarmed and drop their Weapon.

**SPENDING XP [pg. 86]**  
when a model has 5 XP you can spend it to reroll one Flaw or pick a new Feat.

This means you roll for a new Flaw that replaces the previous Flaw.

OR

You can pick a new Feat in addition to any other Feats the model has.

# Equipment, Items, and Weapons

Each crew member has 5+ Strength Equipment slots. Weapons, Items, Armor, Artefacts, and Ammo each take up one Equipment slot unless otherwise stated.

For example, Nifehl the Hermit has a Strength of -3 so only has 2 Equipment slots.

Warbands start with 50 Gold to spend on Equipment, Weapons, and Armor.

They can also recruit a Spellcaster who costs 5 Gold (see *Scrolls* pg. 24).

All characters have Fists as follows:

**Fists [1][On Fumble take 1 Damage. Takes up no Equipment slot.][Strength]**

Each Item below takes up one Equipment slot.

## 1D10

|               |                                                                                       |    |
|---------------|---------------------------------------------------------------------------------------|----|
| 1. Bandages   | [Cures Bleeding (pg. 22).]                                                            | 1G |
| 2. Lantern    | [Required for models to see in the dark.]                                             | 3G |
| 3. Torch      | [As a lantern but only lasts 3 rounds. Can be used as a One-Handed Makeshift Weapon.] | 1G |
| 4. Backpack   | [Takes up one Equipment slot but provides two additional slots.]                      | 1G |
| 5. Potion     | [Heals D6, then drinker makes a Toughness test or becomes Dazed (pg. 22).]            | 6G |
| 6. Ammo       | [Five shots per stack of Ammo.]                                                       | 1G |
| 7. Antidote   | [Cures Poisoned (pg. 23).]                                                            | 7G |
| 8. Tincture   | [Cures Diseased (pg. 22).]                                                            | 7G |
| 9. Cannonball | [One Shot of Cannon Ammo]                                                             | 2G |
| 10. Whisky    | [After drinking, auto-pass Morale tests for the remainder of the Scenario.]           | 2G |

## [WEAPON NAME] [DAMAGE] [PROPERTIES] [MODIFIER][COST]

All Ranged Weapons come with five Ammo, except for the Cannon which comes with one Ammo.

### ONE-HANDED RANGED WEAPONS [TAKE UP 1 EQUIPMENT SLOT]

|     |                                                          |       |
|-----|----------------------------------------------------------|-------|
| 1-3 | Flintlock Pistol [D8][Ranged, Explode, Reload][Presence] | [15G] |
| 4-7 | Sling [D4][Ranged][Agility]                              | [1G]  |

### TWO-HANDED RANGED WEAPONS [TAKE UP 2 EQUIPMENT SLOTS]

|       |                                                 |        |
|-------|-------------------------------------------------|--------|
| 8-9   | Musket [D10][Ranged, Explode, Reload][Presence] | [20G]  |
| 10    | Cannon [D20][Ranged, Explode, Reload][Strength] | [100G] |
| 11-15 | Crossbow [D6][Ranged, Cruel, Reload][Presence]  | [8G]   |
| 16-19 | Bow [D6][Ranged][Presence]                      | [5G]   |

### ONE-HANDED MELEE WEAPONS [TAKE UP 1 EQUIPMENT SLOT]

|       |                                                                        |        |
|-------|------------------------------------------------------------------------|--------|
| 20-25 | One-Handed Makeshift Melee Weapon [D4][Strength]                       | [Free] |
| 26-29 | Staff [D4][Strength]                                                   | [1G]   |
| 30-35 | Shortsword [D6][Agility]                                               | [2G]   |
| 36-40 | Dagger [D4][Thrown][Agility]                                           | [1G]   |
| 41-43 | Hand Axe [D8][Thrown][Strength]                                        | [3G]   |
| 43-46 | Ulfberht Sword [D8][Criticals cause Bleeding (pg. 22)][Strength]       | [5G]   |

|        | [On a Fumble user becomes Diseased instead]                     |       |

# ARMOR

To convert Armor from MÖRK BORG, take the average result on the Armor

Dice and round down. For example, Light Armor has a d2 damage reduction in MÖRK BORG. In Forbidden Psalm this translates to 1.

## 1. Light Armor

Armor Value: 1

Cost: 2 Gold

## 2. Medium Armor

Armor Value: 2

Cost: 10 Gold

## 3. Heavy Armor

Armor Value: 3

Special: takes up two slots.

Cost: 20 Gold

## 4. Helm

Armor Value: 0

Special: ignores Dazed (pg. 22).

Cost: 5 Gold

## 5. Shield

Armor Value: 0

Special: if an attack would deal damage to the bearer, they can instead choose to destroy the Shield and ignore the damage.

Cost: 2 Gold

## 6. Tower Shield

Armor Value: 0

Special: acts as cover, all ranged attacks suffer -3 to hit the bearer, takes up two Equipment slots.

Cost: 5 Gold

## 7. Full Plate

Armor Value: 4

Special: +2 Strength required to use or wearer suffers -1 Agility, takes up two Equipment slots.

Cost: 50 Gold

## 8. Pet Armor

Armor Value: 1

Special: can be used on any pet.

Cost: 10 Gold

## 9. Improvised Armor

Armor Value: 1

Special: -1 Agility.

Cost: Free

## 10. Comfy Socks

Armor Value: 0 (1 if model has at least one Scroll).

Special: takes up no Equipment slots.

Cost: 15 Gold.

## ARMOR RULES

- Armor reduces damage by its Armor Value.
- All sources of damage are reduced by the Armor unless otherwise stated.
- Armor takes up one Equipment slot unless otherwise stated.
- Only one piece of Armor and one Shield can be used by a model at a time.
- Scrolls cannot be used by models wearing Armor with Armor Value higher than 2 or while using a Shield.

# STATES AND PROPERTIES

Some States and Properties are provided for reference, and are not currently used in Forbidden Psalm, but appear in other Forbidden Psalm works, and so are repeated here for use with content from other books and zines.

**AF(X) [Automatic Fire]:** when attacking with this Weapon, roll X dice instead of 1, and take the best result (you still only roll damage once, even if multiple dice are a success). X equals the number after AF, e.g., AF3 means roll 3 dice and take the best result. However, if you roll a 1 on any die you also Fumble. This means you can Fumble and score a successful hit.

**AP [Armor Piercing]:** ignores all Armor.

**Bleeding:** model suffers 1 damage per activation until healed. This damage ignores Armor.

**Blinded:** model cannot make ranged attacks, and suffers -3 to all other attacks.

**Bulky:** model suffers -6 to all rolls made when using this Weapon, Armor, or Item unless they have +3 Strength.

**Burn:** targeted models make a Toughness test. On failure they are set on fire, suffering 1 damage each time they activate. Model can use an action to put out the fire and remove Burn.

**Called Shot:** before rolling to hit you can, instead of using the Grenade/Weapon as normal, elect to try a Called Shot. Select a number from 1-20 aloud, and then roll a D20. If you roll the chosen number you get the Grenade into the target's mouth, exploding them from within. They are instantly Dead.

If you do not roll the correct number, the Grenade is wasted.

**Cruel:** always deals at least 1 damage regardless of Armor.

**Dazed:** must make a Presence test to activate. On failure the model can only move, on success model is no longer Dazed.

**Diseased\*:** model suffers -3 to all tests until cured.

State lasts between Scenarios.

**Explode:** on Fumble, Weapon deals max damage to user and is destroyed. Also does half damage to all other models in combat with user.

**Gas:** affects an area of the board. Models activating within or moving into Gas must make a Toughness test or become Poisoned. Any model ending their turn in Gas suffers 2 damage.

**Jam:** on a Fumble, this Weapon becomes Jammed instead of being dropped. Models may use an action to attempt an Agility test to clear the Jam. If this test is Fumbled, the gun breaks and becomes a Makeshift Weapon. Otherwise the Jam is cleared.

**Poisoned\*:** model can only move or take an action, but not both, until given antidote.

**Ranged:** can be used to make an attack up to 12 inches away.

**Ranged (X):** can be used to make an attack up to X inches away, where X is indicated by a number such as 6 inches or 24 inches

after the word Ranged.

**Reach:** attack an enemy 2 inches away without provoking an attack back.

**Thrown:** Weapon can be thrown up to 6 inches without penalty.

**Reload:** model must spend its movement reloading the Weapon before it can be used again.

**Reload (X):** as above but can be fired a number of times equal to X before needing to be reloaded.

**Smoke:** obscures vision for purposes of line of sight. Models activating within or moving into Smoke must make a Toughness test or suffer 1 damage.

**Two-Handed:** takes up two Equipment slots.

**Template:** may target the ground. On a successful throw the template is placed by the active player. On a failure it is a dud, and no template is placed. On a Fumble the template is placed with the active model at its centre. Template = 3 inch wide circle. At the end of each turn, roll a D6. On 5+ the template is removed from the board.

\*Note that some Poisons and Diseases have additional effects.

# Reading a Scroll

Models can read a Scroll to cast a spell by making a DR12 Presence test. On success the spell is cast. On a failure or Critical, mark a Tragedy. Reading does not consume the

Scroll, and models can read the same Scroll multiple times per Scenario.

Tragedies carry between games and are spent when rolling on the Calamity Table.

If a model ever Fumbles when reading a Scroll, immediately roll on the Calamity Table, adding any incurred Tragedies to the result, to a maximum of 20.

Spells have a maximum range of 12 inches.

Calamities last the duration of the Scenario unless otherwise stated.

Models cannot read Scrolls while using a Shield or while wearing Armor with AV higher than 2.

Models cannot read Scrolls while they are in melee combat.

## SPELLCASTERS

Each warband can recruit a Spellcaster at creation at the cost of 5 Gold. They come equipped with two random Scrolls, one Clean and one **UNCLEAN**. You can

also buy them additional Equipment. After hiring a Spellcaster, assign Stats and roll a Flaw and a Feat as normal. This model counts towards the warband's five member limit.

# Calamity Table

1. Blood spills from the reader's eyes. They are Blinded (pg. 22).
2. The reader begins to glow an eerie green colour. Opponents get +3 to hit the reader.
3. The reader's fingers split open. They are Bleeding (pg. 22).
4. A **Death** bell rings. If the reader is Downed this Scenario they are considered Dead and do not get a Death Save (pg. 86).
5. Amnesia. The Reader forgets what is happening around them and their actions trigger no XP gain for this Scenario.
6. Reader's hands begin to glow with hellfire. They suffer D4 damage and drop any held Weapons. This damage ignores Armor.
7. Dissonant whispers plague the reader's mind. Paranoid, they can only flee the battlefield.
8. Everything feels fine, it's fine. Every time the reader activates, roll a D20. On a result of 7 they explode and are instantly Dead.
9. The ground boils around the reader and they sink into the mud. They must make a Strength test to escape or are stuck in place.
10. Time slows, tick tocking away. The reader is always the last model to activate for that player.
11. The Scroll bursts into flame and is lost forever.
12. The reader vanishes as they fall into Refva. They return at the end of the next round, suffering D4 damage.
13. A Sock Stealing Goblin (pg. 78) appears next to the reader and immediately attacks them.
14. One Item the reader has on them awakens and attacks them. It has D4 HP and deals D4 damage. The Item is lost forever.
15. The reader is transformed into a blinded penguin for D4 rounds,
16. cannot read Scrolls, and all attacks become Beak, [D4] [Strength]. The reader's arm becomes hostile towards them forever, immediately making an attack against them (Fists). Repeat this attack each round. The reader can, as an action, remove their own arm, gaining the Lost Limb Injury (pg. 88).
17. The spell works but instead targets the reader.
18. The reader makes a Presence test. On failure they melt into a puddle on the ground. While technically alive, they are considered Dead for warband composition. As they are not Dead, they can not be brought back to life.
19. HE appears, devouring the reader and all models within 3 inches. Anyone devoured Dies instantly and does not get a Death Save.
20. Roll twice and take both results. This result stacks.

# scrolls

## ROLLING D44

To roll D44, roll a D4 and another D4, and do not total the results.

Instead, use the first D4 to determine the tens place and the second D4 to determine the ones place. For example, rolling 1 and 3 on the respective dice indicates result 13. Not Dead Yet.

## Clean Scrolls D44

### 11. Hope's Last Breath

Heal a model within 1 inch of reader for D6 HP.  
*Does not work on Downed or Dead models.*

### 12. Will of the Optimistic

Target model adds an extra D6 to the next test they make.

### 13. Not Dead Yet

A Dead model is awakened with 1 HP and an additional Flaw.

### 14. Second Wind

Target gains 1D6 extra HP until the end of the Scenario. Reduce the reader's maximum HP by 2 each time they cast Hope's Last Breath. Does not work on Downed or Dead models, and the reader cannot target themselves.

### 21. Visions of Tomorrow

Target model must flee as per Morale rules (pg. 41).

### 22. Shield of the Faithless

Model cannot be targeted by ranged attacks for one round.

### 23. False Dawn

Target model produces light as if they had a lantern. Lasts 5 rounds.

### 24. Mind Blast

Target model must pass a Presence test or they become Dazed (pg. 22) for 1 round.

### 31. Golden Flare

Target model must pass a Presence test or they become Blinded (pg. 22) for 1 round.

### 32. Obey

Target model must obey one command, taking one action or movement. The action must be one the target can complete. On failure the reader instead performs the command if it can, but under the control of the other player. Speak the command before rolling the dice.

### 33. Unbreakable

Target cannot fail Morale tests for the rest of the Scenario.

### 34. Immortalium Inventioni

Target cannot be killed this Scenario, no matter what.

They can still be Downed. On a Fumble the reader is marked for death and if Downed automatically dies.

### 41. Sanctify

Monsters ignore the target for the rest of the Scenario unless they attack a Monster. On a Fumble, instead of rolling a Calamity, the Laughing Man (pg. 69) appears on a random board edge and targets the reader.

### 42. Bow of Skaði.

Target increases range of all ranged attacks by 3 inches for the Scenario.

### 43. Danse Macabre

Target must make a Presence test or lose their movement for the remainder of the Scenario as they dance on the spot. Fumbles while casting cause

the reader to dance instead. Dancing models can spend their action to attempt a Presence test to stop dancing.

### 44. Visions of the Future

Target can reroll one test this Scenario.

# UNCLEAN

## 11. Flaming Hands of

### St. Valleron

Reader hurls a ball of fire at an enemy it can see, dealing D6 damage [Cruel].

## 12. Mindless Eyes

Target model becomes deranged and must make a Presence test or attack the nearest model.

## 13. Invisible Hands

Can move an object (dropped Weapon or Treasure) D12 inches.

## 14. Ungrounded

Target model can hover for 1 round, ignoring all terrain features and moving at twice normal speed.

## 21. Breath of the Undying

Target model begins to suffocate and takes D4 damage when activated. Must make a Presence test as an action to remove effect.

## 22. One-Eyed King

Target becomes invisible and cannot be targeted by attacks, spells, or Monsters. Lasts until they makes a test of any kind.

## 23. Bones, then Damn Bones

A Skeleton (pg. 78) appears at a target point on the board. It always fights the nearest model, but never attacks the reader. On failure to cast it still appears but always moves towards and attacks the reader. If reader dies, it leaves the board.

## 24. Eternal Sleep

Target must make a Presence test or fall asleep. They cannot be activated until they are woken up, either by taking damage or by a friendly model using an action to rouse them.

## 31. Ride the Lightning

Reader produces lightning and strikes a target within 12 inches. Deals D6 damage. Ignores Armor.

# SCROLLS

## 32. Lost at Sea

Target model must make a DR4

Presence test. On a failure they are removed from play and must make a Death Save. On failure to cast the reader must instead take this test. Can only be cast once per Scenario.

## 33. Doom

All models within 12 inches, including allies and the reader, must make a Presence test or take D10 damage, ignoring Armor. Any failure to cast this Scroll is considered a Fumble.

## 34. Boil the Blood

Target makes a Toughness test. On failure their blood boils, dealing 1D8 damage, ignoring Armor.

## 41. Vocare Cattus

Summon the Cath Palug (pg. 58). This is not recommended.

## 42. Miasma

Target becomes Diseased

(pg. 22) and is surrounded by a 1 inch Gas cloud on all sides.

## 43. Soul Bind

Cast to collect the soul of the recently Dead. Binds the soul of a single model killed during this Scenario to the reader.

Bound souls can be sold to a soul collector after the Scenario for Gold equal to the model's HP.

## 44. CHAOS

When casting this spell, first roll to determine a random Unclean Scroll. The reader must then attempt to cast that Scroll. Any targets are selected after rolling to determine which Unclean Scroll is cast.

# PETS

In addition to five members, warbands can recruit a single pet by paying the associated cost. Except for the rules listed below, pets act as warband members in every other way.

Pets have Stats as described.

Unless otherwise stated under their profile, pets cannot:

- use Scrolls.
- search for Treasure.
- use/carry Equipment or Weapons.

## **The Goodest Doggo** 15 Gold

*Agility:+2 Presence:0 Strength:0 Toughness:-2*

Bite [D6][Strength]

Can search for Treasure.  
Can pick up and carry 1 item.

## **Snail/Slug Wizard** 50 Gold

*Agility:-2 Presence:+1 Strength:-1 Toughness:0*

Comes with 1 random Scroll

Can cast Scrolls.

Is considered unarmed and never makes attacks.

## **Pet Rock** Free

*Agility:-10 Presence:0 Strength:0 Toughness:+10*

It's a rock, and can be carried as Equipment.

Can be thrown at enemies [D6][Thrown][Strength].

## **Chaos Beast** D4xD4xD4xD4 \* Gold

*Agility:D4 Presence:D4 Strength:D4 Toughness:D4*

Chaotic Attacks[3D4][Presence]

Criticals and Fumbles: Chaos Beast takes D4 damage in addition to other effects.

\*Cost is rerolled and must be paid again between Scenarios.

## Mount

30 Gold

Can be ridden by other party members. Requires an action to mount or dismount. Mounts do not get an activation when ridden. Cannot climb.

*Agility:+4 Presence:-2 Strength:+1 Toughness:0*

Kick[D8][Strength]

When mounted, rider and Mount act as one. When mounted, use Mount's Agility and Strength and rider's Presence and Toughness. When mounted, makes only one attack with either Mount or rider. Rider must dismount to search or interact with Scenario Items. Acts independently when not mounted.

## Fire Hawk

20 Gold

*Agility:+5 Presence:0 Strength:-2 Toughness:-4*

Throw Fire [D4][Ranged 2, Burn, does not provoke attacks back][Agility]

Flying: Ignores all terrain during movement.

## Snake

10 Gold

*Agility:+4 Presence:-2 Strength:-1 Toughness:-3*

Bite [1][Agility]

Venomous: On successful bite, target must succeed at a Toughness test or become Poisoned (pg. 23). Target is also Dazed (pg. 22) for one round.

## Giant Bombardier Beetle 15 Gold

*Agility:+1 Presence:-3 Strength:-2 Toughness:+2*

Noxious Chemical Spray[D4][Ranged 6][Agility]

# WOLVES

Does your warband have extra Gold to spend?  
Do they want to give someone a break?  
Then hire a **Mercenary** today!

For just **25 Gold** you can hire one of the following  
Mercenaries to join for one Scenario.

These Mercenaries replace one of your warband  
members for that Scenario.

If a Mercenary is killed they can never be rehired  
during a campaign.

Their Stats and Equipment cannot be swapped or replaced.  
Mercenaries never drop their Equipment by choice.  
Each Mercenary can only be hired by one warband per  
Scenario.

### **Rain the Smoothest**

by Ash Barker

Agility: +2 Presence: +2 Strength: -1 Toughness: -2

Equipment: Short Sword, Medium Armor

Flaw: Brittle Bones

Feat: Improvised Fighter

Special: Blood-Countess' Blessing,  
can reroll one die per Scenario.

### **The Witch of Herbeck Fen**

Agility: +1 Presence: +4 Strength: -3 Toughness: +0

Equipment: Scrolls: Obey, One-Eyed King,  
Light Armor, Potion,

Flaws: Luddite, Loner

Feat: Barkskin, Alchemist

Special: Claw Attack [D4][Agility]

**The Witch can only be  
hired from  
Scenario 19  
onwards.**

# Mercenaries

## Wallace (Of House Greyhound)

Agility:+5 Presence:0 Strength:0 Toughness:0

Equipment: Rapier, Light Armor

Special: Quick as a greyhound. Once per Scenario can make a burst of speed. Gains +5 Agility for that Round. However at end of that Round roll Presence test. On a failure like a Greyhound Hugo sees a rabbit and flees the table chasing it.

## Survivor of The Last War

Agility:-2 Presence:+2 Strength:+2 Toughness:-1

Equipment: Rifle and Ammo [see The Last War]

Feat: Pick a random Feat from The Last War.

## Space Penguin

Agility:+0 Presence:+3 Strength:0 Toughness:+3

Equipment: Bite [1d4][Agility]

Flaw: None

Feat: None

Special: Immortal Feline. HP can never drop below 1.

## Brenin Arthur

Agility:+2 Presence:+5 Strength:+3 Toughness:+1

Equipment: The Caledfwlch Sword [D10][Criticals destroy enemy Weapons][Strength] and Heavy Armor

Flaw: None

Feat: None

Special: As an action can give a speech. Allied warband members auto-pass Morale tests for the remainder of this Scenario.

# PLAYING THE GAME

## Setup

1. Pick a Scenario to play (pgs. 96-161).
2. Set up the board (pg. 82).
3. Determine starting Weather and Conditions (pg. 44).
4. Determine Initiative (see below).
5. Deploy as per Scenario rules.

## Initiative

Roll a D20. Highest result picks a model to activate first.

## Deployment

Starting with whoever won the Initiative roll, players alternate placing one model at a time until all models are placed.

Models must be placed within 6 inches of a board edge or based on Scenario rules.

## Each Game Round

1. Determine Initiative for that round.
2. Take it in turns to activate a single model.
3. Activate Monsters if any are in play (pg. 46).
4. End the game round.

# Making Tests

All tests, unless specified otherwise, are DR12. This means you roll a D20, add relevant modifiers, and check the result. If, with modifiers, you reach at least a 12, you succeed.

Rolling a 1 before applying modifiers is always a failure and is called a **Fumble**.

Rolling a 20 before applying modifiers is always a success and is called a **Critical**.

## Movement

Models can move a number of inches equal to 5+ Agility.

Models can move in any direction or combination of directions, up to their maximum movement.

Terrain smaller than 1 inch can be moved over for free.

Terrain larger than 1 inch must be climbed. Models have a climb speed of half their movement speed, rounded down. Models must end their movement on a flat surface.

Models can jump gaps of 3 inches or less, but must pass a DR12 Agility test to do so. On failure they fall and take 1 damage per inch dropped, rounded down. On a Fumble they also gain a new Injury (pg. 88).

Models that move off a board edge are treated as having survived, and no longer participate in the Scenario.

## EXAMPLE

*Nifehl the Hermit wants to jump over a gap. He rolls a D20 plus his Agility, which in this case is +3. He rolls a 10, and adding his +3 Agility gives him a result of 13, enough to pass the test.*

*He lands within 1 inch of an enemy and hits it with his sword. On this test he adds his Strength, a -3. He rolls a D20 and gets a 14. His -3 Strength takes the result to 11, and he fails to hit.*

## Activating a Model

When selected to activate, a model can perform a movement and then an action. Each model gets a single activation per round. If a model wishes to move, it must move before it performs an action. After performing its action, its activation ends.

If a Condition, Flaw, Feat, State, Property, or other rule triggers when a model is activated, players must trigger the effect at the start of the activation, before the model moves.

## Actions

- Make a ranged attack.
- Make a melee attack.
- Use a piece of Equipment or Feat.
- Read a Scroll (and likely die).
- Pick up and/or drop any number of Items on the ground or on Dead/Downed models within 1 inch of the activating model.
- Drag a Downed model within 1 inch.
- Interact with Treasure or Scenario Items within 1 inch.
- Make a second move.

# Combat

1. Check range.
2. Check Stat modifier to apply based on Weapon.
3. Roll attacks.
4. Apply damage if hits are successful.

## Melee Attacks

An attacking model must be within 1 inch of their target model.

Pick one Weapon to use.

Roll a DR12 test using the appropriate Stat modifier as determined by the Weapon (pg. 19).

Melee attacks are risky, and targeted models can attack back at the same time, at -3 to their roll. Both models roll to hit, and then roll for damage for any successful hits achieved. This -3 penalty to attack back rolls is negated if there is another model that is friendly to the target model within 1 inch of the attacker.

On a Fumble, the activating model drops their Weapon.

**Remember: all models have Fists.**

**Fists [1][On Fumble take 1 Damage. Takes up no Equipment slot.][Strength]**

If the target model survives and has not activated, it can still activate this round.

# Ranged Attacks

[Ranged Weapons have a maximum range of 12 inches unless otherwise noted.]

Models in melee cannot make ranged attacks. For example, a model in melee cannot use a Crossbow to make a ranged attack.

Ranged Weapons count as One-Handed Makeshift Melee Weapons (pg. 19) and can be used to make melee combat attacks.

Attacking models must be able to see at least part of the target model. If the target model is in any way obscured, apply a -3 modifier to the attacker's roll. Models obscured in this way have cover. Models in melee are considered obscured, and thus ranged attacks on targets in melee suffer a -3 modifier.

Roll a DR12 test, plus all relevant modifiers, to see if the attack hits, and mark 1 Ammo off the attacking model's total. On success, roll the Weapon's damage.

Models can throw any Weapon up to 6 inches, but suffer a -3 penalty to their roll unless the Weapon has the [Thrown] Property. Whether or not they hit, thrown Weapons are placed on the ground next to the target.

# Damage

When you successfully hit with a Weapon, roll the Weapon's damage dice.

Deduct the target's Armor Value from the result and reduce their HP by the difference. Armor always reduces damage unless otherwise stated.

**Criticals always cause max damage.**  
Armor is still applied.

## EXAMPLE

*Nifehl the Hermit has Armor of 2 and gets hit by a short sword for D6 damage. His opponent rolls a 4.*

*Subtracting the 2 for his Armor, he suffers 2 damage.*

# Leaving Combat

Models within 1 inch of each other are in combat.

If a model wishes to leave combat, their opponent can decide to stop them. Monsters always try to stop models leaving combat.

The opponent makes a DR12 Agility test.

If the opponent succeeds, the leaving model cannot leave combat and does not move.

If the opponent fails, the leaving model can leave combat and moves up to their movement value, but can take no further action.

If the opponent Fumbles, the leaving model can move and take an action.

If the opponent Criticals, the opponent makes an attack against the leaving model.

Models can freely move off a board edge to leave the Scenario.

# Dragging Models

Models can drag other models within 1 inch that are Downed or Dead.

While dragging, a model can only move half its movement and cannot take any other actions. In order to drag, a model must have at least +1 Strength.

## Morale

When a model rolls for Morale they make a Presence test. On failure they flee the fight, immediately moving their max movement towards the nearest board edge.

On their next activation they retake the test. On a success they act as normal, on a failure they continue to move off the board.

They retake this test every round until they pass or

leave the battlefield. Models leaving combat due to Morale cannot be stopped by enemy models or Monsters.

Models make a Morale test when:

- they are Critically hit,
- they strike a Downed enemy.

## Downed and Dead

When a model's HP is equal to or less than 0 it is Downed.

Lay it face up on the board.

If a Downed model takes any more damage it is immediately Dead. Lay it face down on the board.

Downed models must pass a **Death Save** at the end of the Scenario, to determine if they died or managed to crawl their way off the field, bloodied and broken.

A Death Save is a Toughness test against DR6.

On a failure or Fumble they are Dead.

On a success they are wounded and must roll an Injury (pg. 88).

On a Critical they learned something new. Roll an Injury (pg. 88) and also gain a new Feat (pg. 16).

**Treasure Rolls**  
Scenarios indicate how and when to roll for Treasure.

Treasure Rolls are DR10 Presence tests.

On failure the model cuts their hand on rusty nails and takes **1 damage that ignores Armor**.

On success they roll on the Treasure Table relevant to the Scenario.

The model then, if they have Equipment slots free, picks up that Item. If they do not have slots free the Item is instead placed on the ground and can be

picked up by another model.

Coins do not take up Equipment slots.

# Omen

At the start of a Scenario, each player gains the following six **Omens**. Each **Omen** can be used only once per Scenario, and can be used at any time, even after dice have been rolled. If both players wish to use an **Omen**, the active player goes first.

- **Devastation:** Deal maximum damage with an attack.
- **Fate:** Reroll any dice, yours or someone else's.
- **Grace:** Remove a Downed model from play, it auto-passes its Death Save.
- **Banality:** Cancel one **Critical** or **FUMBLE**.
- **Greed:** Reroll on the Treasure Table.
- **Confidence:** Automatically pass one test e.g., jumping, Morale, or combat.

# Weather and Conditions

For Chapter 1 roll a D10.

For Chapter 2 and further roll a D20.

Roll on this table to determine the Weather or Conditions that apply to a Scenario.

|       |                  |                                                                                                                                                   |
|-------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 1-3   | Rain             | All Agility tests are -1.                                                                                                                         |
| 4     | Fog              | All ranges are reduced by 3 inches.                                                                                                               |
| 5     | Fungi            | All Treasures are covered in fungus. Failed Treasure Rolls now deal D4 damage.                                                                    |
| 6     | Lightning        | Each round, roll a D10 per model. On a 1 they suffer 2 damage.                                                                                    |
| 7-8   | Night            | Darkness.                                                                                                                                         |
| 9-11  | Dusk             | Partial Darkness.                                                                                                                                 |
| 12    | Bleak Sun        | Models auto-pass Death Saves (pg. 86) for this Scenario.                                                                                          |
| 13    | Psychic Haunting | Any surviving models in this Scenario must make a Presence test. On failure they are haunted by what they have seen and gain a new Flaw (pg. 14). |
| 14-15 | Merchant         | Glömm the Collector (pg. 132) is here. Place Glömm an equal distance from both players' deployments.                                              |
| 16    | Death            | The Cath Palug (pg. 58) appears on a random board edge at the start of round 4.                                                                   |
| 17    | Mirth            | The Laughing Man (pg. 69) appears on a random round, roll a D6 to determine which.                                                                |
| 18-19 | Peace            | No Condition.                                                                                                                                     |
| 20    | Bad Day          | Roll twice and take both results.                                                                                                                 |

**Darkness** Models without a torch, lantern, or other source of light, and not within 6 inches of another model with a source of light, suffer -6 to all rolls. Models in Darkness cannot target or be targeted by enemy ranged attacks or Scrolls.

**Partial Darkness** As above, but only suffer -3 to rolls, and the range of light sources extends to 9 inches.

RANDOM MONSTERS

| D100  | Name                                                 | Amount to Spawn   |           |        | Base Size         |
|-------|------------------------------------------------------|-------------------|-----------|--------|-------------------|
|       |                                                      | COOP              | Solo play | Versus |                   |

| 22-26 | Goat (pg. 66)                                        | 2D4               | 1D6       | 1D6    | 25mm              |
| 27-31 | Faecal Ghoul (pg. 65)                                | 1D6               | 1D6       | 1D4    | 25mm              |
| 32-35 | Aderyn y corph (pg. 50)                              | 1D4               | 1D4       | 1D4    | 25mm              |
| 36-39 | Mutant Chicken of Kalkoroth (pg. 70)                 | 2D4               | 1D6       | 1D6    | 25mm              |
| 40-41 | The Laughing Man (pg. 69)                            | 1                 | 1         | 1      | 25mm              |
| 42-46 | Spider Brood (pg. 53)                                | 2D4               | 1D8       | 1D8    | 25mm              |
| 47-52 | Satanic Seitan (pg. 73)                              | 1D8               | 1D6       | 1D6    | 25mm              |
| 53-55 | Rat King (always comes with D4 Plague Rats) (pg. 73) | 1                 | 1         | 1      | 25mm              |
| 56-60 | Plague Rats (pg.73)                                  | 2D6               | 2D4       | 1D8    | 25mm              |
| 61-64 | Silent (pg. 74-75)                                   | 1D4               | 1D2       | 1D4    | 25mm              |
| 65-68 | Citizens of Dawnblight (pg. 60)                      | 1D6               | 1D4       | 1D6    | 25mm              |
| 69-73 | The Editors (pg. 79)                                 | 1D4               | 1D2       | 1D4    | 25mm              |
| 74-78 | Ice Guard (pg. 68)                                   | 1D6               | 1D4       | 1D6    | 25mm              |
| 79-83 | Bone Horror (pg. 57)                                 | Spawn 1 See Entry |           |        |                   |
| 84-85 | Púca (pg. 72)                                        | 2                 | 1         | 1      | 32mm              |
| 85-89 | Morka-Porka (pg. 70)                                 | 4                 | 3         | 3      | 32+mm             |
| 90-91 | Nagl (pg. 71)                                        | 1                 | 1         | 1      | 32mm              |
| 92-94 | Great Maw (pg. 67)                                   | 1                 | 1         | 1      | 50mm              |
| 95-96 | Corpse Collector (pg. 61)                            | 1                 | 1         | 1      | 50+mm             |
| 97-98 | Acid Slimeblob (pg. 50)                              | 2                 | 1         | 2      | 50mm              |
| 100   | Cath Palug (pg. 58)                                  | 1                 | 1         | 1      | 60mm or House cat |

# HARVESTING

Even at the end of it all, there are those who will pay well for **SWEET MEATS.**

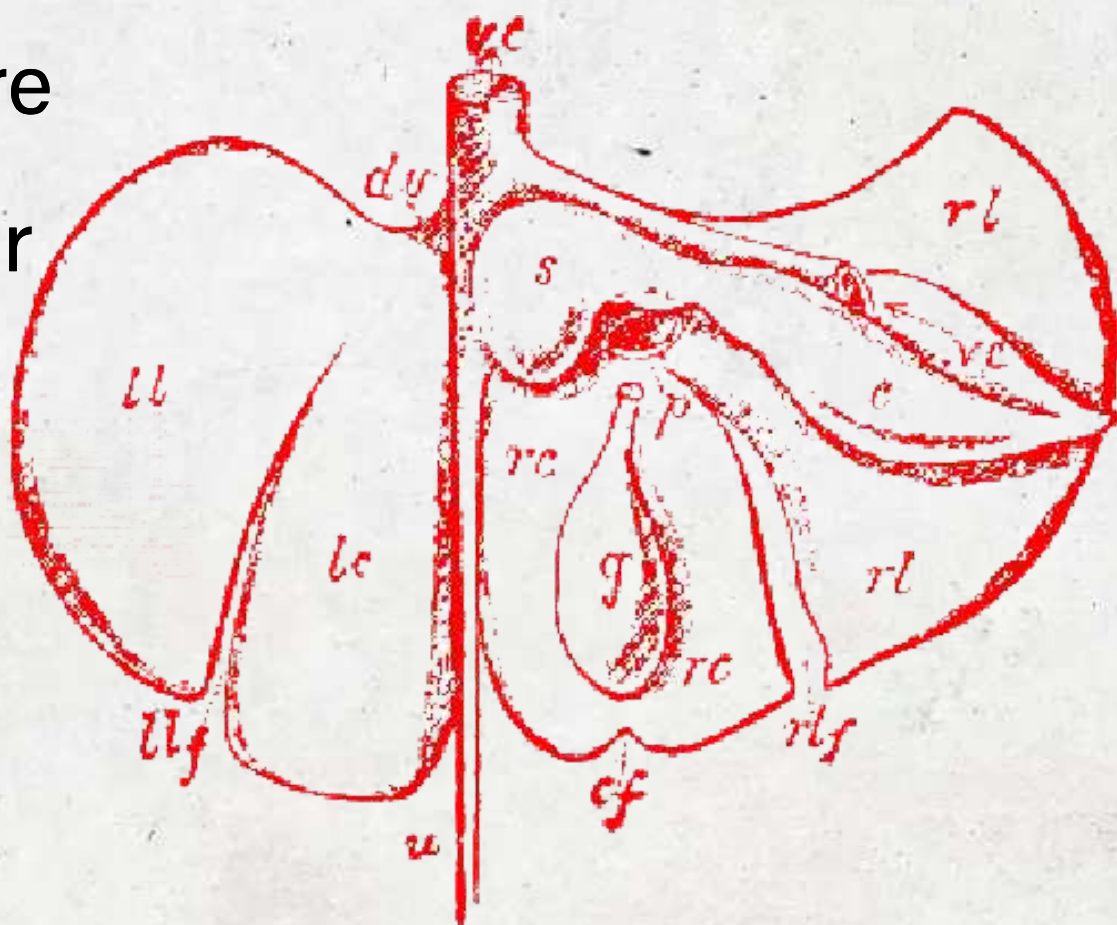

When a Monster is Dead, a model can take an action to harvest from them.

Models make a DR12 Presence test. On

success they gain an organ that they can sell for 5 Gold at the end of the Scenario (remove Monster corpse from board on a success). Harvested organs take up an Equipment slot.

On failure they are

disgusted by their actions and must check Morale.

# Setting up the Board

This game can be played on boards of any size, but is recommended for boards of 2ft by 2ft.

Terrain should be used to reduce lines of sight.

Players each place a single piece of terrain on the board.

After placing a piece of terrain, players roll a D6 and add the number of currently placed terrain pieces. If the result is a 9 or more, stop placing terrain. For example, if players have placed 6 pieces of terrain and then roll a 3 on the die they would stop adding terrain (total of 9).

Scenarios are designed to be played over a maximum of 6 rounds, unless a Scenario states otherwise. At the end of the 6 rounds the warbands get bored, are Dead, or have fled in terror.

Any Items left on the board at the end of round 6 are considered lost if they are on a model that Died or Dies as a result of a Death Save.

Some Scenarios have custom round lengths.

If you are playing on larger boards you may want to increase the amount of turns you are playing for.
