

Life and death in Mordheim is decided by the quantity and quality of the weapons a warrior carries. This section describes the different weapons and other equipment such as armour and shields.

Fist

The truly desperate, who don't even own a knife, have to fight with their bare hands. Needless to say, their chances of survival are comparable to Halflings going without food for eight hours!

Note: The following rule only apply to warriors who have lost their weapons. Creatures such as Zombies, animals, etc, ignore these rules. Warriors using their fists can only ever make 1 attack.

Range: Close Combat; **Strength:** As user -1; **Special Rule:** +1 Enemy armour save

SPECIAL RULE

+1 Enemy armour save: An enemy wounded by a fist gains a +1 bonus to his armour save, and a 6+ armour save if he normally has none.

Dagger

Daggers and knives are extremely common, and men are allowed to carry them in enclaves where weapons are otherwise forbidden. Many a warrior in Mordheim has died with a dagger in his back.

Range: Close Combat; **Strength:** As user; **Special Rule:** +1 Enemy armour save

SPECIAL RULE

+1 Enemy armour save: Daggers are not the best weapons to use for penetrating an enemy model's armour. An enemy wounded by a dagger gains a +1 bonus to his armour save, and a 6+ armour save if he has none normally.

Hammer, staff, mace or club

Perhaps the simplest type of weapon, these brutal, bludgeoning instruments range from primitive wooden clubs to elaborately forged Dwarf hammers made from the finest steel. A blow from a mace can easily crush a skull or knock a man unconscious.

Range: Close Combat;
Strength: As user; **Special Rule:** Concussion

SPECIAL RULE

Concussion: Hammers and other bludgeoning weapons are excellent to use for striking your enemy senseless. When using a hammer, club or mace, a roll of 2-4 is treated as *stunned* when rolling to see the extent of a model's injuries.

Axe

The axe is the traditional weapon of Empire woodsmen, and is also used as a weapon in poorer rural areas. Axes have a heavy blade and, if swung by a strong man, can cause a lot of damage. The blade of an axe can easily cut through armour, though it requires considerable strength from the wielder.

Of all the warriors in the Old World, Dwarfs are the most adept at making axes. Their axes are invaluable to the warriors of the Old World and are some of the most sought after weapons.

Range: Close Combat; **Strength:** As user; **Special Rule:** Cutting edge

SPECIAL RULE

Cutting edge: An axe has an extra save modifier of -1, so a model with Strength 4 using an axe has a -2 save modifier when he hits an opponent in hand-to-hand combat.

Sword

The sword is often referred to as the 'king of weapons'. The most common sword available, the broadsword of the Empire, is a masterpiece by the standards of any smith: four full feet of gleaming steel, double-edged and razor-sharp.

Swords are much more effective weapons than crude clubs and axes, though learning to use a sword is a long and difficult process. It takes years to truly master this weapon – most warriors in Mordheim die long before they get this far!

Range: Close Combat; **Strength:** As user; **Special Rule:** Parry

SPECIAL RULE

Parry: Swords offer an excellent balance of defence and offence. A model armed with a sword may parry blows. When his opponent rolls to hit, the model armed with a sword may roll a D6. If the score is greater than the highest to hit score of his opponent, the model has parried the blow, and that attack is discarded. A model may not parry attacks made with double or more its own Strength – they are simply too powerful to be stopped.

Flail

The flail is a heavy weapon wielded with both hands. It normally consists of heavy weights, often spiked, attached to a pole or handle by means of heavy chains. Flails drain the user's stamina quickly, but are awesomely destructive in the hands of a skilled (or unbinged) warrior.

Range: Close Combat; **Strength:** As user +2;
Special Rules: Heavy, Two-handed

SPECIAL RULES

Heavy: A flail is extremely tiring to use and thus the +2 Strength bonus applies only in the first turn of each hand-to-hand combat.

Two-handed: As a flail requires two hands to use, a model using a flail may not use a shield, buckler or additional weapon in close combat. If the model has a shield he still gets a +1 bonus to his armour save against shooting.

Morning star

A morning star consists of a wooden or steel shaft with heavy chains that have spiked steel balls attached. It is very destructive and requires great skill to wield effectively.

Range: Close Combat; **Strength:** As user +1; **Special Rules:** Heavy, Difficult to use

SPECIAL RULES

Heavy: The morning star is extremely tiring to use, so its +1 Strength bonus applies only in the first turn of each hand-to-hand combat.

Difficult to use: A model with a morning star may not use a second weapon or buckler in his other hand because it requires all his skill to wield it. He may carry a shield as normal though.

Halberd

The halberd's heavy blade is mounted upon a sturdy shaft of oak or steel and has a point like a spear and a cutting edge like an axe. Since it can be used to chop as well as thrust, it is an adaptable weapon, but is difficult to use inside buildings.

Range: Close Combat;

Strength: As user +1; **Special Rule:** Two-handed

SPECIAL RULE

Two-handed: A model armed with a halberd may not use a shield, buckler or additional weapon in close combat.

If the model has a shield he still gets a +1 bonus to his armour save against shooting.

Spear

Spears range from sharpened sticks used by Goblins to the impressive cavalry spears typical of the Elves.

Range: Close Combat; **Strength:** As user;

Special Rules: Strike first, Unwieldy, Cavalry bonus

SPECIAL RULES

Strike first: A warrior with a spear strikes first in the first turn of hand-to-hand combat.

Unwieldy: A warrior with a spear may only use a shield or a buckler in his other hand. He may not use a second weapon.

Cavalry bonus: If using the rules for mounted models, a mounted warrior armed with a spear receives a +1 Strength bonus when he charges. This bonus only applies for that turn.

Lance

Lances are long, heavy spears used by mounted shock troops to rip through armour and fling their foes to the ground. They are the chosen weapons of Knights Templar and other wealthy warriors. To use a lance requires great skill and strength, and only the richest warriors ride the heavy warhorses needed to wield these mighty weapons effectively.

Range: Close Combat; **Strength:** As user +2; **Special Rules:** Cavalry weapon/bonus

SPECIAL RULES

Cavalry weapon: A warrior must own a warhorse to use a lance, as it can only be used whilst he is on horseback.

Cavalry bonus: If using optional rules for mounted models, a warrior armed with a lance receives a +2 Strength bonus when he charges. This bonus only applies for that turn.

Double-handed sword, hammer, axe, etc

A blow from a double-handed axe or sword can cut a foe in half and break armour apart. It takes a long time to learn how to use these weapons and even then only extremely strong men are able to wield them effectively.

Range: Close Combat; **Strength:** As user +2;

Special Rules: Two-handed, Strike last

SPECIAL RULES

Two-handed: A model armed with a double-handed weapon may not use a shield, buckler or additional weapon in close combat. If the model is equipped with a shield he will still get a +1 bonus to his armour save against shooting.

Strike last: Double-handed weapons are so heavy that the model using them always strikes last, even when charging.

Gromril weapon

Only a Dwarf Runesmith can forge a weapon from gromril, a rare meteoric iron. A blade fashioned from this metal will stay keen for a thousand years.

A gromril weapon has an extra -1 save modifier, and costs four times the price of a normal weapon of its kind. You may choose which type of hand-to-hand weapon is offered to you as explained in the Trading section.

Ithilmar weapon

Elven blades are forged from priceless ithilmar, an extremely light but strong metal, found only in the fabled Elven kingdoms. A few of these weapons are occasionally found in the Old World and these are normally spoils of war, taken by the Norse raiders who pillage the coastal settlements of the Elves.

An ithilmar weapon gives its user +1 Initiative in hand-to-hand combat, and costs three times the price of a normal weapon of its kind. You may choose which hand-to-hand weapon is offered to you as explained in the Trading section.

Short bow

Short bows are small, short-ranged bows that are cheap and require little strength to use. Some cavalry carry a shortened bow which is easier to shoot from horseback than a larger bow. Halflings also use short bows, as they lack the strength and height required to use a long bow.

Maximum Range: 16"; **Strength:** 3; **Special Rules:** None

Bow

The bow is carried by most races and used extensively in warfare. It is a compact yet powerful weapon, that is cheap to make and easy to maintain.

Maximum Range: 24"; **Strength:** 3; **Special Rules:** None

Long bow

A long bow is made of alternating layers of either yew or elm. A skilled archer can hit a chosen leaf on a tree from three hundred paces with this weapon.

The long bow is favoured by experienced archers due to its great reach and accuracy.

Maximum Range: 30"; **Strength:** 3; **Special Rules:** None

Elf bow

Elven bows are the finest missile weapons of their kind. Constructed from ithilmar or wood from the Elf forests, with strings woven from the hair of Elf maidens, Elven bows are far superior to any missile weapons made by other races. In the hands of an Elven archer, the Elf bow is a truly potent weapon, its long range and penetrating power making it far superior to any bow made by humans.

Maximum Range: 36"; **Strength:** 3; **Special Rules:** -1 Save modifier

SPECIAL RULE

Save modifier: An Elf bow has a -1 save modifier on armour saves against it.

Crossbow

A crossbow consists of a short, strong bowstave mounted on a wooden or steel stock. The crossbows of the Empire are made of steel and often include a winding mechanism to draw back the string. It takes a long time to prepare a crossbow, but a bolt fired from one has a tremendous range and can penetrate armour easily.

Crossbows take much longer than other bows to make, so they are expensive and relatively rare weapons. Still, they are the preferred weapon of many in Mordheim because of their power and long range.

Maximum Range: 30"; **Strength:** 4; **Special Rule:** Move or fire

SPECIAL RULE

Move or fire: You may not move and fire a crossbow on the same turn, other than to pivot on the spot to face your target or to stand up.

Sling

Slings are rarely used, mainly because they are no more powerful than bows and have a shorter range. A sling is little more than a looped strip of cloth or leather into which a stone is placed. The sling is whirled about the slinger's head and the sling stone is then released towards the target.

While this weapon is looked down upon by most archers, a skilled slinger can slay a man from a considerable distance, and the ammunition is easy to find: rocks are everywhere and free!

Maximum Range: 18"; **Strength:** 3; **Special Rule:** Fire twice at half range

SPECIAL RULE

Fire twice at half range: A slinger may fire twice in the shooting phase if he does not move in the movement phase. He cannot shoot over half range (9") though, if he fires twice. If the model fires twice then each shot is at -1 to hit.

Throwing star/knife

Throwing stars are used mainly by the assassins of the sinister House of Shadows, or by street thugs who specialise in ambushing the unwary. A perfectly balanced knife thrown from behind has ended the life of many a noble and merchant in Mordheim. Throwing knives are not suitable for close combat, as their balance makes them unwieldy in close quarters.

Range: 6"; **Strength:** As user;
Special Rule: Thrown weapon

SPECIAL RULE

Thrown weapon: Models using throwing stars or knives do not suffer penalties for range or moving as these weapons are perfectly balanced for throwing. They cannot be used in close combat.

Repeater crossbow

Repeater crossbows are extremely complex devices, expensive to acquire and difficult to make. While this makes them rare, they certainly have their uses: they can rain a deadly hail of bolts on enemies, and a warrior using one may move quite fast and still fire his weapon.

Maximum Range: 24"; **Strength:** 3; **Special Rule:** Fire twice

SPECIAL RULE

Fire twice: A model armed with a repeater crossbow may choose to fire twice per turn with an extra -1 to hit penalty on both shots.

Crossbow pistol

Crossbow pistols are masterpieces made by expert weaponsmiths. They are miniature crossbows with all the power and accuracy of the real thing. As these weapons may be easily concealed, they are the favoured weapon of assassins.

Maximum Range: 10"; **Strength:** 4; **Special Rule:** Shoot in hand-to-hand combat

SPECIAL RULE

Shoot in hand-to-hand combat: A model armed with a crossbow pistol may shoot it in the first round of a hand-to-hand combat and this shot is always resolved first, before any blows are struck. This shot has an extra -2 to hit penalty. Use model's Ballistic Skill to see whether it hits or not. This bonus attack is in addition to any close combat weapon attacks.

Blackpowder weapons are only a very recent invention in the Warhammer world. They are often unreliable and temperamental but they do hit exceedingly hard and armour offers almost no protection, as their lead bullets can penetrate even the strongest breastplate or shield.

Most blackpowder weapons are bought from Dwarfs at great expense, though some of the forges of Nuln and Altdorf have started to experiment with making handguns.

Pistol

A pistol is a small, simple blackpowder weapon fired by a spring mechanism. Most pistols are expensive, unreliable, and poorly constructed.

Maximum Range: 6"; **Strength:** 4; **Special Rules:** Prepare shot, Save modifier, Hand-to-hand

SPECIAL RULES

Prepare shot: A pistol takes a whole turn to reload, so you may only fire every other turn. If you have a brace of pistols (ie, two) you may fire every turn.

Save modifier: Pistols are even better at penetrating armour than their Strength value of 4 suggests. A model wounded by a pistol must take its armour save with a -2 modifier.

Hand-to-hand: Pistols can be used in hand-to-hand combat as well as for shooting. A model armed with a pistol and another close combat weapon gains +1 Attack, which is resolved at Strength 4 with a -2 save modifier. This bonus attack can be used only once per combat. If you are firing a brace of pistols, your model can fight with 2 Attacks in the first turn of close combat. These attacks are resolved with a model's Weapon Skill like any normal close combat attack and likewise may be parried. Successful hits are resolved at Strength 4 and with a -2 save modifier, regardless of the firer's Strength.

Duelling pistol

A duelling pistol is a work of art, and a gunsmith labours long and hard to produce a single example. They are often carried by Imperial nobles to solve disputes over love and honour, and many a noble has died at dawn in a duel over some grievance.

Duelling pistols are prohibitively expensive weapons and common warriors rarely have them. Even if they do manage to steal or buy one, the ammunition is prohibitively expensive.

Some of the wealthiest warriors in Mordheim carry duelling pistols as status symbols, commanding great respect, admiration and envy.

Maximum Range: 10"; **Strength:** 4;

Special Rules: Accuracy, Prepare shot, Save modifier, Hand-to-hand

SPECIAL RULES

Accuracy: A duelling pistol is built for accuracy as a skilled duellist is able to hit a coin from twenty paces. All shots and close combat attacks from a duelling pistol have a +1 bonus to hit.

Prepare shot: A duelling pistol takes a complete turn to reload, so your model may only fire every other turn. If he has a brace of duelling pistols he may fire every turn.

Save modifier: Duelling pistols are even better at penetrating armour than their Strength 4 suggests. A warrior wounded by a duelling pistol must make his armour save with a -2 modifier.

Hand-to-hand: Duelling pistols can be used in hand-to-hand combat as well as for shooting. A model armed with a duelling pistol and another close combat weapon gains +1 Attack, which is resolved at Strength 4 with a -2 save modifier. This bonus attack can be used only once per combat. If you are firing a brace of duelling pistols, your model can fight with 2 Attacks in the first turn of close combat. These attacks are resolved with a model's Weapon Skill like any normal close combat attack and likewise may be parried. Successful hits are resolved at Strength 4 and with a -2 save modifier, regardless of the firer's Strength.

Blunderbuss

A blunderbuss is a primitive blackpowder weapon, which fires a hail of lead balls, rusty bolts, bent nails, and other assorted scrap metal. It is a powerful, if erratic, weapon and takes such a long time to load that most warriors discard it after the first shot.

Maximum Range: Special; **Strength:** 3;

Special Rules: Shot, Fire once

SPECIAL RULES

Shot: When your model fires the blunderbuss, draw a line 16" long and 1" wide in any direction from the firer (the line must be absolutely straight). Any and all models in its path are automatically hit by a Strength 3 hit.

Fire Once: It takes a very long time to load a blunderbuss so it may only be fired once per battle.

Handgun

A handgun is a simple firearm. The quality of construction varies ranging from the crude wooden 'bakbuts' of the artillery school of Nuln, to the more sophisticated Dwarf firearms that have levers and springs which hold the burning match, and triggers which release the firing mechanism and fire the gun.

Handguns are not terribly reliable weapons: the gun barrel occasionally tends to explode violently or the powder fails to ignite. But the weapon has a great range and tremendous penetrating power, making a mockery of even the thickest armour.

In Mordheim, handguns are rare and expensive, but a warband which can boast such a weapon will command respect from all its rivals.

Maximum Range: 24"; **Strength:** 4;

Special Rules: Prepare shot, Move or fire, Save modifier

SPECIAL RULES

Prepare shot: A handgun takes a complete turn to reload, so you may only fire it every other turn.

Move or fire: You may not move and fire a handgun in the same turn, other than to pivot on the spot to face your target or stand up.

Save Modifier. Handguns are even better at penetrating armour than their Strength 4 suggests. A warrior wounded by a handgun must take its armour save with a -2 modifier.

Hochland long rifle

Hochland is a province famed for its hunters, and the preferred weapon of its nobility when they go hunting is a long-ranged rifle. They are extremely rare and precious weapons, and only the most experienced weaponsmiths are capable of manufacturing them.

Maximum Range: 48"; **Strength:** 4;

Special Rules: Move or fire, Prepare shot, Pick target, Save modifier

SPECIAL RULES

Move or fire: You may not move and fire a Hochland long rifle in the same turn, other than to pivot on the spot to face your target or stand up from knocked down.

Prepare shot: A Hochland long rifle takes a complete turn to reload, so you may only fire it every other turn.

Pick target: A model armed with a Hochland long rifle can target any enemy model in sight, not just the closest one.

Save modifier: Hochland long rifles are even better at penetrating armour than their Strength 4 suggests. A warrior wounded by a long rifle must make his armour save with a -2 modifier.

When fighting in close combat, a good suit of armour may mean the difference between life and death. The finest armour in the known world is made in Dwarf forges, where the secrets of steel and fire are well understood. Hardened leather jackets are often worn by the hunters of Osterland, while city soldiers prefer mail coats and steel breastplates. The forges of the Empire have many skilled smiths capable of forging fine armour, for the humans learned this craft from Dwarf master smiths in the early days of the Empire.

In Mordheim, only the most wealthy and powerful are able to afford the luxury of owning a suit of armour (the less well-off have to make do with leather tunics and occasionally helmets and wooden shields). The richest leaders of the most successful warbands wear suits of high quality armour and a good suit of armour is just as much a symbol of wealth and power as it is protection against weapons.

Light armour

Light armour encompasses a wide variety of materials from hardened leather tunics to chain shirts forged from steel. It does not offer complete protection against arrows or swords, but it is better than having nothing at all. Light armour does not inhibit movement.

ARMOUR SAVING THROW

Save: A warrior who is wearing light armour has a basic D6 saving throw of 6.

Heavy armour

Typical heavy armour is made from metal links and is called chain mail. Forging chain mail is a laborious and time consuming process, as the blacksmith must put together hundreds, sometimes thousands, of metal links. This makes chain mail expensive, but this type of armour provides excellent protection for anyone who can afford it.

There are other types of heavy armour as well, of which the best known are the steel breastplates and greaves worn by the foot knights of the Templar orders.

SPECIAL RULES

Save: A warrior that is wearing heavy armour has a basic D6 saving throw of 5+.

Movement: A warrior that is armed with both heavy armour and a shield suffers a -1 Movement penalty.

Shield

There are two types of shield common to the warriors of Mordheim: the first is made of wood, occasionally reinforced with metal plates. This basic type of shield, although strong, does tend to splinter, but this can sometimes save the user's life as his enemy's weapon can get trapped allowing him to strike back whilst his enemy struggles to free his weapon.

Metal shields are heavy and cumbersome, but last much longer and can take a battering. A typical Empire shield is either round or triangular, and carries the emblem of the province or city of its owner.

ARMOUR SAVING THROW

Save: A model with a shield has a basic save of 6 on a D6.

Buckler

Bucklers are small, round shields designed for parrying or deflecting blows. They are usually made of steel for they need to be tremendously durable to survive the brutal blows of hand-to-hand combat. Using a buckler requires great skill, but a nimble warrior can protect himself from blows which would otherwise cripple him.

SPECIAL RULE

Parry: A model equipped with a buckler may parry the first blow in each round of hand-to-hand combat. When his opponent scores a hit, a model with a buckler may roll 1D6. If the score is greater than the highest to hit score of his opponent, the model has parried the blow, and that attack is discarded. A model may not parry attacks made with double or more its own Strength – they are simply too powerful to be stopped.

Helmet

From the shining steel helmets of Bretonnian knights to the leather caps of the Skaven, all sensible warriors try to protect the most vulnerable part of their body – their head. Even the most vain fighters still use a helmet, as it can be festooned with plumes, horns and other decorations.

Helmets come in varying shapes and sizes, but their basic function remains the same.

SPECIAL RULE

Avoid stun: A model that is equipped with a helmet has a special 4+ save on a D6 against being *stunned*. If the save is made, treat the *stunned* result as *knocked down* instead. This save is not modified by the opponent's Strength.

Ithilmar armour

Ithilmar is a silvery metal which is as light as silk and stronger than steel. Elves are experts at fashioning weapons and armour from ithilmar, and the Elven kingdom of Caledor is the only place in the world where this metal can be found.

Ithilmar armour gives the wearer a 5+ basic save, and does not slow him down if he is also armed with a shield.

Gromril armour

Gromril is the rarest and strongest metal known of in the Old World. Only a very few Dwarf smiths know the secret of forging gromril, and a suit of armour made from it fetches a huge price.

Gromril armour gives the wearer a 4+ basic save, and does not slow him down if he is also armed with a shield.

This section covers all the strange and unusual equipment your warriors can find in the ruins or buy from the merchants and peddlars in the settlements and villages around Mordheim.

Only Heroes may buy and carry the equipment described in this section. You may not give it to Henchmen unless the rules specifically say so.

rope & hook

A warrior using a rope & hook will find it much easier to move amongst the ruins of Mordheim.

A warrior equipped with a rope & hook may re-roll failed Initiative tests when climbing up and down.

poisons and drugs

The use of poison is almost universally abhorred, but in the ruthless and brutal battles fought in Mordheim, desperate warbands often resort to the use of envenomed blades.

Poison may not be used with blackpowder weapons. When you buy a vial of poison, there is always only enough to last the duration of one battle. You can only poison a single weapon with one vial of poison.

Black Lotus

In the deepest forests of the Southlands grows a plant that is extremely poisonous. It is known as Black Lotus and is much sought after by alchemists, assassins, wizards of the Western Coast and bored wives.

A weapon coated with the sap of the Black Lotus will wound its target automatically if you roll a 6 to hit. Note that you can still roll a dice for every wound inflicted in this way. If you roll a 6, you will inflict a critical hit with that roll. If you do not roll a 6, you will cause a normal wound. Take armour saves as normal.

Dark Venom

This is a poison extracted from Helderakes, gigantic sea serpents that plague the Western Ocean and the coast of Naggaroth. The slightest wound infected by Dark Venom causes excruciating pain, incapacitating the bravest of men.

Any hit caused by a weapon coated with Dark Venom counts as having +1 Strength, so, for example, if a warrior with Strength 3 wielding a poisoned sword hits an opponent, he will cause a Strength 4 hit instead. Armour saving throws are modified to take into account the increased Strength of the attack.

Mad Cap Mushrooms

The feared cult of Goblin Fanatics of the Worlds Edge Mountains use these hallucinogenic mushrooms to drive themselves into a frenzied state.

Effect: Any warrior who takes Mad Cap Mushrooms before a battle will be subject to *frenzy*. The Mad Cap Mushroom has no effect on Undead such as Vampires and Zombies, or the Possessed.

Side effect: After the battle, roll a D6. On a roll of a 1 the model becomes permanently *stupid*.

Crimson Shade

Crimson Shade is the name given by Old Worlders to the leaves of the blood oak of Estalia. It is an extremely addictive drug, but grants its users inhuman quickness and strength.

Effect: A model using Crimson Shade has his Initiative increased by +D3 points, and Movement and Strength by +1 (this effect lasts for one game). Crimson Shade has no effect on Undead such as Vampires and Zombies, or the Possessed.

Side effects: After the battle, roll 2D6. On a roll of 2-3, the model becomes addicted and you must try to buy him a new batch of Crimson Shade before every battle from now on. If you fail to buy any, he will leave your warband. On a roll of 12 the model's Initiative is increased permanently by +1.

Mandrake Root

The man-shaped Mandrake Root grows in the rotting swamps of Sylvania. It is a noxious, deadly plant which is highly addictive and slowly kills its users, but also allows them to shrug off almost any pain.

Effect: Mandrake Root makes a man almost oblivious to pain. His Toughness is increased by +1 for the duration of a battle and he treats all *stunned* results as *knocked down* instead. Mandrake Root has no effect on Undead, such as Vampires and Zombies, or on the Possessed.

Side effects: Mandrake Root is highly poisonous. At the end of the battle, roll 2D6. On a roll of 2-3 the model loses 1 point of Toughness permanently.

lucky charm

These take many shapes, but the most common are symbolic hammers that a pious Sigmarite Priest has touched, or carved heads of ancient Dwarf gods.

The first time a model with a lucky charm is hit in a battle they roll a D6. On a 4+ the hit is discarded and no damage is suffered. Owning two or more charms does not confer any extra benefits, the model may still only try to discard the first hit.

Blessed water

The priests of Ulric, Sigmar, Mórr and Manann hold great power over evil. Pure water from a clear fountain, blessed by one of these priests, is said to burn things of darkness and evil.

A vial of blessed water contains enough liquid for just one use, and has a thrown range of twice the thrower's Strength in inches. Roll to hit using the model's BS. No modifiers for range or moving apply. Blessed water causes 1 wound on Undead, Daemon or Possessed models automatically. There is no armour save. Undead or Possessed models may not use blessed water.

elven cloak

Made from the hair of Elven maidens and interwoven with living tree leaves, an Elven cloak is a wonder to behold. A warrior wearing such a cloak will blend into the shadows, making it very difficult to shoot at them with missile weapons. Elven cloaks rarely come up for sale, but are sometimes recovered from dead warriors or offered by Elves as rewards to men who have served them in some way.

A warrior aiming a missile weapon at a warrior wearing an Elven cloak suffers -1 on his to hit roll.

hunting arrows

The best hunting arrows are made by the hunters of Drakwald forest. They have sharp, barbed arrowheads which cause excruciating pain when they hit their target. A skilled archer can severely injure his target with a single arrow.

A model using a short bow, bow, long bow or Elf bow may use these arrows. They add +1 to all Injury rolls.

garlic

Garlic is a common herb grown in most gardens of the Empire. It is said to ward off Vampires and other denizens of the dark. A Vampire must pass a Leadership test or it will be unable to charge a model carrying a clove of garlic. Garlic lasts for the duration of one battle only, whether it is used or not.

net

Steel nets, such as those used by Pit Fighters, can be used in battles. Once per game, the net may be thrown in the shooting phase instead of the model shooting a missile weapon. Treat the net as a missile weapon in all respects with a range of 8". Use the model's BS to determine whether the net hits or not – there are no movement or range penalties. If it hits, the target must immediately roll a D6. If the result is equal to, or lower than his Strength, he rips the net apart. If the result is higher, he may not move, shoot or cast spells in his next turn, although he is not otherwise affected. In either case the net is lost.

bugman's ale

Of all the Dwarf brewmasters, Josef Bugman is the most famous. His ale is known throughout the Old World, and widely regarded as the best.

A warband that drinks a barrel of Bugman's before a battle will be immune to *fear* for the whole of the battle. Elves may not drink Bugman's ale as they are far too delicate to cope with its effects. There is only enough ale to supply the warband for one battle.

tome of magic

Sometimes books of forbidden lore are offered for sale in the markets and dark alleys of the settlements around Mordheim.

If a warband includes a wizard, he will gain an extra spell from the tome, permanently. He may randomly generate this new spell from his own list or the Lesser Magic list. See the Magic section for details. The benefits from each Tome of Magic apply to only one model.

holy tome

Books of prayers and descriptions of the holy deeds of religious heroes like Sigmar Heldenhammer are copied by hand in the scriptoriums of Sigmar and Ulric, and given or sold to the faithful. Of these tomes, the *Deus Sigmar* is the most common and well known, but other texts such as the *Scriptures of Sigmar* are also sold to those who follow the faith. A holy man can recite his prayers from such a book, strengthening his faith and belief.

A Warrior Priest or Sister of Sigmar with a holy tome can add +1 to the score when determining whether he (or she) can recite a spell successfully or not.

healing herbs

Certain plants that grow on the banks of the River Stir have curative properties. Herbalists collect their roots and leaves and use them to treat the sick and wounded.

A Hero with healing herbs can use them at the beginning of any of his recovery phases as long as he is not engaged in hand-to-hand combat. This restores all wounds he has previously lost during the game.

holy (unholy) relic

In this age of superstition and religious fanaticism, holy objects are an important part of life. Relics abound in the Old World: hairs of Sigmar, pieces from Ulric's hammer, teeth of Daemon Princes, all are sold to men needing encouragement before battle and as charms against sorcery.

A model with a holy relic will automatically pass the first Leadership test he is required to make in the game. If worn by the leader, it will allow him to automatically pass the first Rout test if he has not taken any Leadership tests before.

You can only ignore the first Leadership test in any single game – owning two or more holy relics will not allow you to ignore second and subsequent tests.

halfling cookbook

All Halfling chefs have their own secret recipes, and these are recorded in tomes handwritten in Mootland, the home country of the Halflings. Food prepared according to these recipes will attract warriors during these lean times.

The maximum number of warriors allowed in your warband is increased by +1 (note that neither an Undead warband nor a Carnival of Chaos warband can use this item).

animals

Animals are not often offered for sale in Mordheim. The polluted grass and filthy water cause most animals to die quickly, and since hunger is commonplace, many have been butchered for food. However, some horses occasionally go on sale for wealthy leaders who enjoy commanding their subordinates from horseback.

Horses & Warhorses

You may mount one of your Heroes on a horse or warhorse in the coming battles.

Horses and warhorses can only be used if you are using the optional rules for mounted models at the back of the book.

Only Humans can buy or use horses and warhorses.

Horse	8	0	0	3	3	1	3	0	5
Warhorse	8	3	0	3	3	1	3	1	5

Wardogs

The men of the Empire have always been experts at raising ferocious bloodhounds to guard their cattle and holdings against roaming Goblins and Beastmen. A highly trained wardog is a dangerous opponent and worth its weight in gold in Mordheim.

If you purchase a wardog, it will fight exactly like a member of your warband, though it is treated as part of the equipment of the Hero who bought it. You will need a model to represent it on a battlefield.

Wardogs never gain experience, and if they are put *out of action* they have exactly the same chance of recovering as Henchmen (ie, 1-2: Dead; 3-6: Alive). Wardogs count towards the maximum number of warriors allowed in your warband.

Profile	M	WS	BS	S	T	W	I	A	Ld
Wardog	6	4	0	4	3	1	4	1	5

You could also use the profile above to represent one of the more exotic animals used by the warbands of Mordheim, such as trained bears, Chaos familiars or even fighting monkeys from the far-off Southlands!

lantern

A model that is in possession of a lantern may add +4" to the distance from which he is able to spot hidden enemies.

superior blackpowder

The model has acquired a better quality of blackpowder than is normally available. This new batch adds +1 Strength to all blackpowder weapons that the model has. There is enough superior blackpowder to last for one game.

mordheim map

Some survivors of the cataclysm still remain in the many settlements around Mordheim, and make a living by preparing maps of the city from memory. Many of these maps are faked, and even real ones are often crude and inaccurate.

A map can help a warband find their way through the confusing maze of streets and into areas with rich buildings to loot.

When you buy a map, roll a D6:

D6 Result

- 1 **Fake.** The map is a fake, and is completely worthless. It leads you on a fool's errand. Your opponent may automatically choose the next scenario you play.
- 2-3 **Vague.** Though crude, the map is generally accurate (well... parts of it are... perhaps!). You may re-roll any one dice during the next exploration phase if you wish but you must accept the result of the second roll.
- 4 **Catacomb map.** The map shows a way through the catacombs into the city. You may automatically choose the scenario next time you fight a battle.
- 5 **Accurate.** The map is recently made and very detailed. You may re-roll up to three dice during the next exploration phase if you wish. You must accept the result of the second roll.
- 6 **Master map.** This is one of the twelve master maps of Mordheim made for Count von Steinhardt of Ostermark. From now on you may always re-roll one dice when rolling on the Exploration chart as long as the Hero who possesses this map was not taken *out of action* in the battle.

cathayan silk cloak

Some rich warband leaders like to flaunt their wealth and purchase clothes made out of silk from distant Cathay. This silk is the most expensive fabric in the known world, and wearing such clothes is a sure way to attract attention – especially thieves and assassins!

Any Mercenary warband whose leader is wearing silk clothes may re-roll the first failed Rout test. However, after each battle in which the leader is taken *out of action*, roll a D6. On a roll of 1-3 the clothes are ruined and must be discarded.

tears of shallaya

Tears of Shallaya are vials of water from the holy spring in Couronne. Shallaya is the goddess of healing and mercy and it is said that this water has curative properties and is proof against any poison.

A model who drinks a vial of the Tears of Shallaya at the beginning of a battle will be completely immune to all poisons for the duration of combat. Undead and Possessed warriors may not use the Tears of Shallaya.

There is enough liquid in a vial of the Tears of Shallaya to last for the duration of one battle.

There have always been those who have used magic: witches and wizards, wise women and warlocks. But as all scholars know, all magic is dangerous, for it originates from Chaos, the source of corruption and change. Indeed, during these times, sorcery is illegal and punishable by death.

Wizards have little say in whether the world of magic touches them or not. They are born with second sight and to them the world of magical energies and spells is much more real than the mundane world of normal mortals. With all the persecution, fear and hatred it is little wonder that wizards become reclusive and suspicious, and many are downright insane. Some even turn to the worship of the dark gods, and others follow the forbidden path of necromancy.

Mordheim has become home to many magic users and they roam the ruins hiding from Witch Hunters. But there are other ways of gaining power over and above that of a normal mortal man. The gods watch over their subjects and a priest of strong faith can call upon them to assist him in battle. Of these, the Priests of Sigmar are the most common, for Sigmar is the patron god of the Empire, and his following is strong during these times of strife.

allocated spells

The chart below summarises the different kinds of magic and explains who can use what spells.

Wizard	Type of Magic
Chaos Magisters	Chaos Rituals
Warlocks	Lesser Magic
Skaven Eshin Sorcerer	Magic of the Horned Rat
Sisters of Sigmar & Warrior-Priests	Prayers of Sigmar
Necromancers	Necromancy

Each wizard starts with one randomly determined spell, but may gain more. Roll a D6 and consult the appropriate chart. If you get the same spell twice, roll again or lower the spell's difficulty by 1.

casting spells

Spells are cast in the shooting phase, and can be used even if the caster is in hand-to-hand combat. To use a spell, the wizard must roll equal to or greater than the spell's Difficulty score on 2D6. If he fails, he may not cast a spell that turn. If the test is passed the spell may be used as described overleaf. A wizard may cast one spell per turn and may not use missile weapons if he wants to cast a spell. He can however run!

A wizard may not use magic if he is wearing armour or has a shield or buckler. The only exception is the Prayers of Sigmar. Sisters of Sigmar and Warrior-Priests may wear armour and use their prayers.

Damage

Some spells cause direct damage, and are resolved the same way as damage from shooting or blows in hand-to-hand combat. Spells do not cause critical hits. Models always receive armour saves against wounds caused by spells unless noted otherwise.
