

Mounted Warriors

As well as being populated by the various humanoid races, the Old World also contains many species of animals – some of which have been tamed and trained to perform a useful function. These can be divided broadly into two groups – animals that can be ridden (eg. horses, giant wolves, Cold Ones, etc) and those that can't (eg. warhounds, giant rats, etc). These rules are intended to flesh-out the rules for mounted warriors from page 163 of the Mordheim rulebook.

Model Representation

If you wish to include riding beasts or tamed animals, you will need to have models to represent them. For mounted warriors you will need both a mounted miniature and a model on foot. It is advised not to glue the rider on but to use Blue-tack or something similar so that he may be removed when on foot and his mount is unriden.

Animal Handling Skills

Many warbands employ unriden, fighting animals. Often one or more members of the warband is nominated to care for the animals, feeding and training them.

Beast Handler (eg. Dog Handler)

This skill is highly beneficial if non-ridden animals are to be included in a warband. This skill must be taken for specific animals and may be taken multiple times for different animals. It represents knowledge of the general care and well being of the animal as well as training techniques.

A warrior with this skill has a beneficial effect on the animals under his care. If a warrior has the Animal Handling skill for a particular animal, any such animals may use his Leadership provided he is within 6". If the warband's leader is also nearby, a player may choose which of the warriors' Leadership to use unless the animal is *stupid*, in which case only the Handler's Leadership may be used. In addition, *stubborn* animals with a Handler in base contact, ignore the effects of *stubbornness*. This counts as an Academic skill.

Riding Animals

Most warriors in Mordheim can only dream of owning a riding animal. Expensive to buy, expensive to keep and requiring skill to ride, they are a mark of status beyond the reach of lowly Henchmen. To those with the necessary wealth

and skill, however, they are a priceless possession, enabling their rider to move rapidly across the battlefield, aiding him in combat with an advantage of height and weight, and in some cases, fighting in their own right.

Mounting Animals. It requires half a warrior's move to mount or dismount a riding creature. A mount or its rider may not run or charge in the same turn that the warrior mounts or dismounts unless the rider has a Special Riding skill that allows this.

Not Indoors. Mounts cannot normally be ridden indoors or underground, unless playing a specially devised scenario that allows this.

Dense Terrain. Riding mounts are rare both amongst the ruins of Mordheim and in the claustrophobic jungles of Lustria. The dense terrain makes riding difficult and large numbers of riders are highly ineffective. Thus in those settings, a warband may only have a maximum of two mounts (not including those belonging to Hired Swords). In more open settings, such as the open fields of the countryside around Mordheim or the deserts of Khemri, a warband may have as many mounts as they can afford.

Controlling a Mount. The Special Riding Skills may be used by warriors who have a riding animal, but only after the skill Ride has been gained; warriors which come provided with a riding animal are assumed to possess the Ride skill already. Warriors without this skill may still ride animals, but must test against their Leadership if hit by any missile, and at the beginning of any Combat phase when a standing enemy is in base contact. If the test is failed they lose control of their mount and must roll on the Whoa, Boy! table. Note that if an enemy is not standing, the mounted warrior is not considered to be in combat and thus does not need to test for loss of control.

Armour Bonus. All riding animals give their riders a +1 Armour save bonus.

Bolting Mounts. In certain circumstances, a mount may bolt. A bolting mount must make a Leadership test at the beginning of the owning

player's turn; if successful, it stops running, otherwise it continues fleeing. The easiest way to determine the direction a mount bolts is to use an Artillery Scatter dice. If you do not have one, then roll 2D6 and use the clock face method. Taking the direction the horse is facing as 12 and directly behind as 6, the horse will bolt in the appropriate direction on the clock face.

Leading Animals. On occasion, a warrior may want to lead a riding animal rather than riding it. A warrior may only lead one riding animal unless he has the Animal Handling skill, for

that particular animal, in which case he can lead as many as he wishes. Groups of led animals are tethered together and must maintain base contact with each other; at least one must be in base contact with the warrior leading them. Riding animals that are being led do not roll for loss of control. If required to make a Leadership test (eg. when charged by a *fear*-causing enemy) they use the Ld of the warrior leading them. A warrior leading riding animals may move and fight as normal, but must maintain base contact at all times.

Un-led Animals. Riding animals which are not being either led or ridden will remain stationary but must make a Leadership test at the beginning of their turn. If this is failed, they will bolt, using the rules above.

Cavalry Skills

Skills may only be used one at a time. If two are applicable to a given situation, the controlling player must decide which to use. All bonuses are cumulative with those gained from a mount, unless otherwise stated.

Ride (eg. Ride Horse)

This skill is vital if a rider wishes to ride an animal into combat. The skill is specific to a particular type of animal and must be gained again if the warrior wishes to be able to ride a different kind of animal. For instance, a warrior with Ride Horse would need to gain the skill Ride Warhorse if he wanted to be able to ride such a spirited mount.

SPECIAL RIDING SKILLS

Cavalry Commander.

Mounted Heroes are an impressive sight. With a good vantage point,

they can see (and be seen) far more readily than if they were on foot. If the warband's leader has this skill and is mounted, he may add an extra 6" to the distance within which other warriors in the warband may use his Leadership. This is in addition to any other bonuses that increase the range of the leader's influence.

Trick Riding. By athletically hanging off the side of his mount, a rider makes himself harder to hit. While a rider is trick riding all missile attacks against him suffer -1 to hit in addition to other modifiers. The rider must declare that he is trick riding before moving. He must then make an Initiative test and, if successful, may move full distance. If he fails he loses control of his mount and must roll immediately on the Whoa Boy! table. This skill may not be used with heavy armour because of the agility required. In addition, trick riding requires both hands, so the model may not use a shield or missile weapons whilst using the skill. Warriors without Ride may not use this skill.

Combat Riding. The rider has trained his mount to use its bulk to trample any unmounted enemy before him. A warrior with this skill may make a single additional S4 attack when charging an unmounted opponent. In subsequent rounds of combat, or if charged by enemy warriors, the mounted warrior fights as normal.

Evade. The rider has trained his mount to swerve from side to side in combat, wrong-footing his opponent. A rider with this skill always strikes first in close combat against dismounted opponents. When charged by an opponent, or otherwise fighting an enemy also entitled to strike first, attacks are carried out in order of Initiative. If Initiative is equal, the model with greater Experience strikes first. Warriors without Ride may not use this skill.

Running Dismount. The rider is able to dismount from his mount at speed. The rider may ride up to the mount's normal move distance and then dismount immediately. No further movement or shooting is possible. This skill may be used to move into contact with the enemy, counting as a diving charge from a height of 2" – all the usual rules for diving charges apply. Note that the rider then counts as dismounted, gaining no further assistance from his mount. Warriors without Ride may not use this skill.

Athletic Mount. Without breaking stride, the warrior is able to leap

onto the back of his mount and immediately spur it into a full gallop. Once the warrior is on board, the mount may make a run or charge move as normal. The warrior must be within half his full move distance of his steed to use this skill.

Horse Archer. The rider has learned the skills of the steppe nomads and can shoot from a running mount. The rider may shoot in a 360 degree arc whilst mounted, and may shoot while his mount is running; however, the shot suffers a -1 to hit penalty in addition to all other normal modifiers. Warriors without Ride may not use this skill.

Mounted Combat Master. The rider is especially skilled at combat against a mounted opponent. If the model is fighting mounted against a mounted opponent and successfully wounds the enemy, the wounded model must add +1 to his roll on the Whoa Boy! table. Warriors without Ride may not use this skill.

Losing Control

If a mounted warrior has lost his last wound, then the player must roll on the Whoa Boy! table. This replaces the normal Injuries chart. If critical hits are suffered, then roll as many times as is required, taking the most serious result.

Whoa Boy! Table

D6	Result
1-2	The rider is temporarily disorientated and his mount rears up. The rider keeps his seat but must spend his next turn stationary regaining control, unable to move or shoot. If attacked, treat the rider as fallen down.
3-4	The rider falls off his mount and is stunned, taking an additional S2 hit in the process with no Armour save. In addition, roll a D6: on a roll of 1-3, the mount immediately bolts 3D6" in a random direction and continues until it has left the table – the mount may be recovered after the battle; on a roll of 4-6, the mount remains stationary and the warrior may remount once recovered. Note: the mount does not count as unriden or un-led in this instance.
5-6	The rider and his mount crash to the ground together. The rider and mount are automatically out of action. In addition, roll a D6: on a roll of 1-2 the mount lands on top of its rider, crushing him. If this happens,

the warrior must roll twice on the Serious Injuries chart after the battle. In addition, after the battle roll a D6: on a roll of 1-2 the mount was crippled or killed by the fall and is removed from the warband roster.

Animal Bestiary

What follows is a summary of animals commonly found in various parts of the world, along with a few less common species. Note that animals are not particularly bright and do not gain Experience. Note also that ridden animals can be ridden, but that doesn't mean that all of them want to be!

Attack Animals

The most common attack animal in the Old World is the faithful wardog, especially favoured by Witch Hunters. Other warbands have their favoured attack animals – Giant Rats for Skaven, Dire Wolves for Vampires, Cold One Beasthounds for the Druchii, Scorpions for Khemrian Tomb Guardians. Whatever the differences between the species, a warrior with several sets of claws and jaws behind him is a more dangerous opponent than a warrior on his own.

For details of the various attack animals available to different races, see the Mordheim rulebook or the relevant warband lists.

Ridden Animals

Humans like their horses, Orcs their boars, Goblins their wolves. All agree that two legs are good, but four legs are better.

War Boar

Cost: 90GC

Availability: Rare 11 (Orcs only)

Large, ferocious and bad-tempered – a perfect mount for an Orc Warlord. Orc warbands occasionally make use of these noisome beasts while exploring the ruins of Mordheim and beyond. It isn't common though, as the bigger and meaner Orcs tend to take the Boars for themselves.

Profile	M	WS	BS	S	T	W	I	A	Ld
	7	3	0	3	4	1	3	1	3

SPECIAL RULES

Ferocious Charge: Orc War Boars attack with +2S when charging, due to their bulk. Note that this applies only to the Boar, not the rider.

Thick Skinned: The thick skin and matted fur of the Boar makes him very hard to wound. Boars confer an additional +1 bonus to the rider's Armour save (making +2 total).

Giant Wolf

Cost: 85GC

Availability: Rare 10 (Goblins only)

The Giant Wolf is common in most of the mountain ranges of the Known World. However, catching one of these nasty, fast-moving beasts is another thing – especially if you are a Goblin.

Profile	M	WS	BS	S	T	W	I	A	Ld
	9	3	0	3	3	1	4	1	4

Note: Giant Wolves cannot be used in a warband that already contains Giant Spiders.

Giant Spider

Cost: 100GC

Availability: Rare 11 (Goblins only)

The Giant Spider is the stuff of nightmares. Typically five to six feet long they are highly prized by Forest Goblins as mounts.

Profile	M	WS	BS	S	T	W	I	A	Ld
	7	3	0	3(4)	3	1	4	1	4

SPECIAL RULES

Poisoned Attack: Giant Spider attacks are poisoned – attacks are considered as Strength 4, but this will not modify any Armour saves.

Wall Walk: Giant Spiders (and their riders) may walk up and down walls without making Initiative tests. They may only jump up to 2" across or down, but this does count as a diving charge. When a Spider jumps, its rider must make an Initiative test; if this test is failed, something has gone wrong – roll on the Whoa Boy! table. Note that even if the rider has the Running Dismount skill, the maximum diving charge is only 2".

Note: Giant Spiders cannot be used in a warband that already contains Giant Wolves.

Mule

Cost: 30GC

Availability: Rare 7 (any warband)

Their stubbornness is legendary, but even so, these beasts of burden are occasionally ridden by Halflings, Dwarfs and even overweight clerics!

Profile	M	WS	BS	S	T	W	I	A	Ld
	6	2	0	3	3	1	2	0	4

SPECIAL RULES

Slow: Mules are not the fastest of mounts and only bolt 2D6".

Stubborn: If a warrior is riding a Mule, or is in base contact with

a Mule, he must make a Leadership test each round or the mule will refuse to move.

Ornery: With no leader or rider, a Mule will wander in a random direction. Should any close combat occur within 6", it will automatically bolt directly away from the combat.

Non-combatant: Mules will not fight in combat and may not be used to charge into combat – they will simply refuse to move. If an enemy warrior charges a ridden Mule, immediately roll on the Whoa Boy! table. If an unriden Mule is charged, it will bolt directly away from the charger.

Riding Horse

Cost: 40GC

Availability: Rare 8 (Humans only)

Riding Horses are not trained for battle and will not normally attack an enemy. However, they are useful for moving rapidly around the field of battle.

Profile	M	WS	BS	S	T	W	I	A	Ld
	8	1	0	3	3	1	3	0	5

Warhorse

Cost: 80GC

Availability: Rare 11 (Humans only)

Warhorses are large, well-trained horses, quite at home in battle. They are primarily used by Human warbands.

Profile	M	WS	BS	S	T	W	I	A	Ld
	8	3	0	3	3	1	3	1	5

SPECIAL RULES

Battle Schooled: The mount has been specially trained to fight on the battlefield. The rider may re-roll any failed Loss of Control tests. Only one re-roll is allowed per test.

Elven Steed

Cost: 90GC

Availability: Rare 10 (Elves only)

Elven Steeds are graceful animals, but have a vicious temperament when called upon to fight. It is rumoured that even Dark Elves breed these fine beasts. Typically, High Elf steeds are grey and white, Wood Elf steeds are tan and white, and Dark Elf steeds are midnight black.

Profile	M	WS	BS	S	T	W	I	A	Ld
	9	3	0	3	3	1	4	1	5

SPECIAL RULES

Battle Schooled: The mount has been specially trained to fight on the battlefield. The rider may re-roll any failed Loss of Control tests. Only one re-roll is allowed per test.

Nightmare

Cost: 95GC

Availability: Rare 11 (Vampires and Necromancers only)

Vampire Counts occasionally need fell steeds to carry them about their business. Who cares if they're dead? They still have legs, don't they?

Profile	M	WS	BS	S	T	W	I	A	Ld
	8	2	0	3	3	1	2	1	5

SPECIAL RULES

May Not Run: As an Undead creature, a Nightmare may not run, but may charge as normal.

Immune to Poison: Nightmares are not affected by poison.

Immune to Psychology: As an Undead creature, Nightmares are immune to psychology, never have to take Leadership tests, and will always stand still if left leaderless. However, if the rider suffers a wound, he must roll on the Whoa Boy! table as normal.

Chaos Steed

Cost: 90GC

Availability: Rare 11 (Possessed warbands only)

Chaos Steeds are malformed, debased parodies of the magnificent Warhorses of the Empire. They are used by Possessed and other Chaos warbands.

Profile	M	WS	BS	S	T	W	I	A	Ld
	8	3	0	4	3	1	3	1	5

SPECIAL RULES

May not be ridden by the Possessed. Even Chaos Steeds are skittish around the abhorrent Possessed and will not allow themselves to be ridden by such a being.

Battle Schooled: The mount has been specially trained to fight on the battlefield. The rider may re-roll any failed Loss of Control tests. Only one re-roll is allowed per test.

Vehicles of the Empire

There are three principal modes of transport in the Empire: travel by boat, by riding animals, such as horses and mules, and travel by wagon or coach. Riding animals have already been covered in 'Blazing Saddles' which is featured in the Mordheim Annual. Here we will cover the rules for travel via boat and wagon.

Wagons

This covers carts, stagecoaches and all two- and four-wheeled forms of transport commonly found in the Empire.

MOVEMENT

A wagon's movement is determined by how laden it is with passengers and cargo. Therefore throughout a game, a wagon's move may alter due to unloading or loading up of more passengers and cargo. Consult the table below to determine movement. Wagons cannot charge, climb, hide, run or flee.

TURNS

Wagons, regardless of size, may make a single turn of up to 45 degrees at the end of its movement. It may then apply the lash if desired. Make turns by pivoting the vehicle from its mid-point.

APPLYING THE LASH!

There are many reasons why a wagon driver would want to urge his beasts to go faster – if he is being pursued by bandits or mutants, for example! By applying the lash to his draft beasts, the driver of a wagon can attempt to gain some extra movement. After the wagon has moved normally, the player may roll a D6. On the score of 2+ this indicates how many extra inches the wagon may move ahead in a straight line. On the roll of a 1 something drastic has happened. Roll on the table below:

Applying The Lash

D6 Result

1-2 Steeds Tiring – The draft animals are growing tired – if the driver applies the lash next turn you must halve the score rounding fractions up.

3-4 Driver Shaken – Due to the wagon's speed the driver is thrown all over the place and may not apply the lash next turn as he recovers his composure.

5-6 Out of control – Make a roll on the Out of Control table.

Wagon Movement

No. of passengers or cargo quota	Standard Movement	Applying the lash!
1 (driver – compulsory)	10	+D6
2-3	8	+D6
4-6	6	+D6

TERRAIN

Difficult Ground: If a wagon enters difficult ground roll a D6. On a score of a 1 immediately make a roll on the Out of Control table, otherwise the wagon is fine.

Very Difficult Ground: If a wagon enters very difficult ground immediately make a roll on the Out of Control table with a modifier of +1.

Walls/Obstacles: If a wagon collides with a wall or other solid obstacle it comes to an immediate halt. The wagon suffers D3 hits at a Strength of 7 (see below).

Impassable Ground: If a wagon moves onto impassable ground it is immediately destroyed and each crew member/draft animal must make an Injury roll. Remove the wagon and place any surviving crew within 3" of the crash site.

COLLISIONS

If a wagon collides with another wagon both suffer D3 Strength 7 hits (roll location and damage as normal below). In the case that either attackers or defenders block the way of a wagon and it cannot move around them then the wagon will move through the models, even if they are from the defending warband. All of the models touched by a wagon that is forced to move through them must roll lower or equal to their Initiative or suffer a S4 hit with all of the consequences. Warriors that are out of action cannot get out of the way of a wagon and are therefore automatically hit. Whenever a wagon collides with anything roll a D6, on a score of a 1 make an Out of Control test.

TRANSPORT

For the sake of simplicity all wagons and coaches may transport up to six human-sized warriors or smaller (let's be having no Ogre wagoneers now!) or the equivalent in cargo (this will be covered in greater detail in the Scenarios section). One crewman must be allocated as the driver and one may 'ride shotgun' with him. The driver may do nothing else but drive whilst the wagon is moving as he is too busy controlling the reins. In the event that the driver is knocked down, stunned or taken out of action a crew member riding shotgun may take over the reins and become the new driver.

MOUNTING/DISMOUNTING

A friendly warrior may board a stationary wagon by simply moving into contact with it (wagons are only considered stationary if they didn't move in their last turn). Place the model either on the wagon or move it with the wagon in base contact to simulate it being transported. Similarly, a warrior may dismount from a stationary wagon by moving away from contact. Warriors may attempt to mount or dismount from a moving wagon by passing an Initiative test. If they fail, they take falling damage of D3 automatic hits at a Strength equal to half the vehicle's speed. Warriors may attempt to board a moving wagon from either another moving wagon or from a moving mount with a modifier of -1 to their Initiative test – this counts as a charge.

LOSING CONTROL OF THE DRAFT ANIMALS

Apart from if a wagon becomes a runaway, control may also be lost by attackers attempting to wrestle away the control of the draft animals from the driver. Apart from eliminating the driver and taking control of the reins, the easiest way to control the draft animals is for a warrior to leap onto the back of one and ride it. A warrior can successfully leap onto a draft animal by passing an Initiative test (the warrior may add +1 if they have the Ride skill). If the test is failed then the warrior takes falling damage as usual. The warrior must pass a Leadership test to control the beast and therefore control the direction and speed of the wagon. The driver can only wrestle back control of the wagon by eliminating the warrior (any injury will suffice). If a warrior has successfully mounted a draft animal he may attempt to cut it free from the team on a 4+ although he will lose control of the wagon itself in doing so.

SHOOTING

Shooting from a wagon: Crew may fire from aboard a wagon and have a 360 degree arc of fire. Shooters suffer a penalty of -1 to hit for firing from a moving surface.

Shooting at a wagon: Warriors may shoot at a vehicle and gain a +1 to hit because it is a large target. If a hit is scored against a wagon then a roll must be made on the Location table opposite to decide what part of the vehicle has been hit.

Profile	M	WS	BS	S	T	W	I	A	Ld
Wagon	-	-	-	-	8	4	-	-	-
Wheel	-	-	-	-	6	1	-	-	-
Horse	8	-	-	3	3	1	3	-	-
Horse	6	-	-	3	3	1	2	-	-

LOSS OF A DRAFT CREATURE

Any time a steed is hit, regardless of whether or not it is injured, make a roll on the Out of Control table. If a steed is stunned or knocked down it will be dragged along by its associates until it recovers – next turn reduce speed by 1/2 (with a draft of two animals) or 1/4 (with a draft of four animals) and the driver may not apply the lash. If the steed is taken out of action then permanently reduce the speed by the previous amount until the driver can cut the animal free on the roll of a 5+. If the last steed is stunned, knocked down or taken out of action then the wagon comes to a halt and cannot move unless the steed recovers – make an Out of Control roll with +2 to the result.

Out of Control

D6 Result

1-3 Swerve – The driver temporarily loses control and the wagon veers wildly off course. Roll a D6:

1-3 – Swerves 45 degrees to the left.

4-6 – Swerves 45 degrees to the right.

The wagon then moves another 6" in the predetermined direction.

4-5 Runaway – The steeds bolt and the driver loses control of them. Each turn randomly determine the direction that the wagon goes in. Roll a D6:

1-2 – Swerves 45 degrees to the left.

3-4 – Swerves 45 degrees to the right.

5-6 – moves straight ahead.

The wagon will always move at full speed and roll for applying the lash discounting the effects of a 1 all the time it is a runaway. Each turn the driver may attempt to take control of the steeds. The driver must pass a Leadership test to regain control of the beasts. The crew may not fire missile weapons all the time the wagon is a runaway as they are trying to hold on for dear life.

6 Loss of control – The wagon goes wildly out of control. Roll a D6:

1 – The wagon swerves to the right (see above).

2 – The wagon swerves to the left (see above).

3-4 – The wagon comes to an immediate halt.

5 – The wagon's yoke pole snaps and the draft animals gallop off. The vehicle moves 6" straight ahead and then comes to a halt. The vehicle may no longer move.

6 – The wagon either jackknifes or hits a rock or a depression in the road and goes into a roll! The wagon moves D6" in a random direction determined by the Artillery Scatter dice. Any warriors/beasts it collides with take the usual collision damage. All the crew and draft animals take D3 Strength 4 hits. The wagon is now wrecked.

Wagon Location

D6 Result

1-2 Draft creature – Roll to wound and injure as normal – see loss of draft creature below for effects.

3 Crew – Randomly select a crew member and roll to wound and injure as normal – see Loss of Driver overleaf if applicable. Any crew member that is wounded must make an immediate Initiative test – if this is failed he has fallen from the wagon and must test for falling damage.

4-5 Chassis – Roll to damage the vehicle using the stat line below.

6 Wheel – Roll to damage the wheel using the stat-line below.

Wheel Damage

D6 Result

1-4 Wheel damaged – The wagon's speed is permanently reduced by -2".

5-6 Wheel flies off! – The wagon immediately swerves (see the swerve result on the Out of Control table above) and then comes to a halt. The wagon is now immobile. Roll a D6, on the score of 5-6 the wagon goes into a roll (see the roll result on the Out of Control table above).

WHEEL DAMAGE

If a wheel is damaged this is potentially disastrous. Randomly determine which wheel has been damaged and roll on the table above adding +1 to the result if the wheel has been damaged before.

CHASSIS DAMAGE

When the wagon loses its final point of damage/wound it is destroyed, comes to an immediate halt and each crew member/draft animal must make an Injury roll.

COMBAT

Warriors may strike a stationary wagon in close combat by charging and striking against the part they are in contact with (draft creatures/crew/wheel/chassis).

Chassis/wheels: Attacks hit automatically – just resolve damage.

Crew: Crew on board a stationary wagon are counted as defending an obstacle and a 6 is required to hit them regardless of Weapon Skill. If a crew member is taken out of action an attacker may enter/board the wagon in his next turn.

Draft Animals: The draft animals may be attacked in the usual manner although an attacker may choose to cut the draft animals free instead which requires a 2+ on a D6 to be successful. Draft animals that are cut free count as un-led beasts (see Blazing Saddles).

Warriors may attempt to attack a moving wagon by charging it in the normal way. Note: Charging a moving wagon does not bring it to a halt – the combat round is played out and then the wagon is free to move in its next Movement phase – if it is a runaway then it is compelled to move. Warriors are advised to attack to the side and rear because if they attack to the front they are liable to be run down in the wagon's next turn! Because attacking a moving wagon is a haphazard affair the attacker must determine the location struck first by rolling on the Location table above. Both the chassis and wheels are hit automatically just resolve damage. The draft animals are attacked in the normal manner although an attacker may not attempt to cut the reins on moving draft animals. The crew are difficult to strike and therefore a 6 is required to hit them regardless of Weapon Skill.

If the attackers manage to successfully board the wagon either when it was stationary or by leaping aboard it as it was moving they may engage the crew in combat in the usual manner without any penalties or modifiers. Note: Attackers or defenders that are injured fighting aboard a wagon must pass an Initiative test or fall off.

Boats

This covers small rowing boats through to large river barges. Note that these are very basic rules to cover small skirmishes on the rivers of the Empire, a more inclusive set of rules to cover ocean-going ships is currently in development.

MOVEMENT

Boats move 6" when moving with the current of a river (the direction of the river flow must be established before the start of the game). Boats may move 4" when travelling against the current. Boats must move at least half of their movement allowance unless they have been anchored or tethered to the shore.

URNS

Boats, regardless of size, may make a single turn of up to 45 degrees at the end of their movement.

TERRAIN

A boat can encounter natural terrain such as rocks or man made obstacles such as logjams specifically placed to obstruct its movement. Both the aforementioned terrain types are impassable to boats and they will suffer D3 Strength 7 hits should they move into them and also come to an immediate halt.

COLLISIONS

See page 26 as for wagons.

TRANSPORT

All the above rules for wagons apply. In addition, because boats are considerably bigger than wagons, they can therefore transport a lot more.

A rowboat can transport up to six human-sized warriors or smaller, or the equivalent in cargo.

A river boat can transport up to eight human-sized warriors or smaller, or the equivalent in cargo.

A barge can transport up to

twelve human-sized warriors or smaller, or the equivalent in cargo.

MOUNTING/DISMOUNTING

See above for wagons, except warriors that fail an Initiative test for attempting to board a moving boat do not suffer damage but fall into the water – see the rules for swimming.

SHOOTING

See page 27 as for wagons.

Profile	M	WS	BS	S	T	W	I	A	Ld
Rowboat	-	-	-	-	5	3	-	-	-
Riverboat	-	-	-	-	8	4	-	-	-
Barge	-	-	-	-	8	8	-	-	-

PROPULSION DAMAGE

Either the oars or the mast and rigging have been damaged. Roll a D6 and consult the table opposite:

Boat Location

D6 Result

1 Propulsion – Roll to damage the boat using the stat-line above – if damaged roll again on the Propulsion table.

2 Rudder – Roll to damage the rudder using the stat-line above – if damaged the boat may only turn from now on after coming to a complete halt by using a combination of oars/boat-hooks.

3-4 Crew – Randomly select a crew member and roll to wound and injure as normal – see loss of driver above if applicable. Any crew member that is wounded must make an immediate Initiative test – if this is failed he has fallen from the boat.

5-6 Hull – Roll to damage the boat using the stat-line above.

Propulsion Damage

D6 Result

1-2 Sail damaged/oars splintered – The boat's speed is permanently reduced by -1".

4-5 Rigging damaged/oars splintered – The boat's speed is permanently reduced by -2".

6 Mast falls! – With the loss of the mast (or all of the oars in the case of an oared vessel) the boat may only drift 2" in the direction of the current. All crew must immediately test on their Initiative to avoid the falling mast (this does not apply to oared vessels obviously). If a crewman fails this test he receives an immediate Strength 6 hit.

HULL DAMAGE

When the boat loses its final point of damage/wound it is destroyed and sinks immediately. Each crew member falls into the water and must make the appropriate tests for swimming.

COMBAT

See wagons above. Note: Swimming warriors may not attack boats!
